

Used Oil and Filter Recycling

Your guide for safe disposal and recycling for Calumet County residents

Oil filters and absorbents are banned from landfill disposal since 2011. Recycling just two gallons of used oil can generate enough electricity to run the average household for almost 24 hours.

Do not mix oil. Oil that is contaminated with gasoline, solvents or anti-freeze, cannot be recycled. Mixtures of oil and other household hazardous wastes, such as oil-based paint, solvents, chemicals and gasoline should be brought to the Calumet County Hazardous Waste Program. PLEASE DO NOT LEAVE THESE MATERIALS AT THE USED OIL DROP OFF SITE.

All motor vehicle filters are banned, including those from cars, trucks, buses, motorcycles, tractors, snowmobiles, ATVs, UTVs, and forklifts.

Absorbents banned include granular kitty litter, oil dry, sawdust, rags, wipes, towel-ing, absorbent pillows and pads. The only exception is for amounts less than one gallon from non-routine spills.

Recycling used oil, filters and absorbents preserves natural resources. Wisconsinites previously threw away 9 million oil filters a year with 187,000 gallons of oil in those filters, and 1.6 million gallons of oil in absorbents. Recycling them saves 4.5 million pounds of steel and considerable amounts of crude oil.

Oil filters from other sources, like hydraulic systems and other machinery are not covered under this ban. DNR encourages them to be recycled.
