

Fab Tech Wastewater Solutions breaks the standard on pricing with our new aeration disc!

Fab Tech Waste water Solutions has entered the aeration disc market with the all new Korb-Aer aeration disc! The Korb-Aer disc is guaranteed to match or exceed all competing discs while being available at 15-20% costs savings to you at any order size! With prices scaling to order size you only save more as higher quantities are ordered!

The Korb-Aer disc uses a clamping style mechanism with a center clamp and two clamp bars at the top and bottom of the disc to keep it secure to the shaft and minimize oscillation and vibration. This style of clamping will reduce time wasted on re-tightening loose discs and replacing hardware.

Aeration discs are a wearable item in a waste water plant and need to be replaced every so often, by choosing the Fab Tech Korb-Aer disc you allow yourself budget savings to be used in other areas of your plant. Save in replacement costs and receive a reliable product, call Fab Tech Wastewater Solutions LLC today for a quote on the new Korb-Aer disc and all of your wastewater needs!
