

# Yetispace website brought down by the best!

Over the past year or so, our old klunky Joomla website has been hacked by a number of talented teams and Yetispace congratulates them all for their ingenuity and discipline! The result of their efforts has been to get me off my duff and redo the site. It's now much simpler and will be updated with new stuff.

To the hackers: I get it. It's hard to get noticed in this world, so here ya go!

For now, please let us Get back to our peaceful work? We don't do any military work at all, and aren't against anyone.
