

The CCB Science 2 Service Distance Learning Program
High Watch Recovery Center
Kent, Connecticut

The High Watch Recovery Center Science 2 Service Distance Learning Program contains over 25 individual courses which have been approved by the Connecticut Certification Board for up to 250 hours of addiction specific content. All the materials needed to complete the courses can be found on the dedicated website and are available for download or for printing. We recommend that you familiarize yourself with the format of the courses before beginning.

To begin, simply select the course and click on the title. Each course is different and may contain several modules. Each module includes required reading materials, post-test items to gauge your learning and the answer sheet on which to put your responses for each item. When you have completed all the modules for a specific course, you can submit them directly to the CCB either via email to s2s@ctcertboard.org or via fax at 203.621.3111. To receive a certificate of completion for the course you must answer a minimum of 80% of the items correctly.

If you have specific questions or need assistance, please email Jeff Quamme at jquamme@ctcertboard.org.
