FOOT PROTECTION

CAN/CSA Z195 PROTECTIVE FOOTWEAR

This National Standard of Canada deals with protective footwear and includes requirements for resistance against toe impact, sole puncture, electric shock, chainsaws, as well as requirements for static discharge and electrical conductivity. Footwear that has been certified by CSA International to the CAN/CSA Z195-02 standard is eligible to bear our Protective Footwear Certification Markings.

CSA CERTIFICATION MARK FOR CANADA

Indicates footwear is CSA-certified to Canadian national requirements

LABEL

DESCRIPTION

This serialized label indicates certification by CSA International and is only available through CSA.

LOCATION

This label will be side-stitched or heat-sealed inside the top of the tongue or inside the quarter lining of the right shoe.

CLASSES OF PROTECTION

One or more of these markings will appear on the outer side or the tongue of the right shoe

PROTECTION MARKINGS

SAFETY FEATURES

RECOMMENDED USE

Green triangle indicates sole puncture protection with a Grade 1 protective toe to withstand impacts up to 125 Joules. Comparable to a 22.7 kg (50 lb) weight dropped from 0.6 m. Sole puncture protection is designed to withstand a force of not less than 1200 Newtons (270 lbs) and resist cracking after being subjected to 1.5 million flexes.

For any industry, especially construction and heavy work environments, where sharp objects, such as nails are present.

Yellow triangle indicates sole puncture protection with a Grade 2 protective toe to withstand impacts up to 90 Joules. Comparable to a 22.7 kg (50 lb) weight dropped from 0.4 m. Sole puncture protection is designed to withstand a force of not less than 1200 Newtons (270 lbs) and resist cracking after being subjected to 1.5 million flexes.

For light industrial work environments requiring puncture protection as well as toe protection.

Blue rectangle indicates Grade 1 protective toe without sole puncture protection. Grade 1 protective toe withstands impacts up to 125 Joules. Comparable to a 22.7 kg (50 lb) weight dropped from 0.6 m.

For industrial work environments not requiring puncture protection.

Grey rectangle indicates Grade 2 protective toe without sole puncture protection. Grade 2 protective toe withstands impacts up to 90 Joules. Comparable to a 22.7 kg (50 lb) weight dropped from 0.4 m.

For institutional and non-industrial work environments not requiring puncture protection.

White label with green fir tree symbol indicates chainsaw protective footwear. Protective features are designed into the boots to prevent a running chainsaw from cutting all the way through the boot uppers so as to protect the shins, ankles, feet and toes.

For forestry workers and others exposed to hand-held chain saws or other cutting tools.

White rectangle with orange Greek letter omega indicates soles that provide resistance to electric shock. Such certified footwear contains a sole and heel design assembly that, at the point of manufacturing, has electrical insulating properties intended to withstand 18 000 Volts and a leakage current not exceeding 1 mA.

For any industry where accidental contact with live electrical conductors can occur. Warning: Electrical Shock Resistance deteriorates with wear and in wet environments.

Yellow rectangle with green "SD" and grounding symbol indicates soles are static-dissipative. The outer soles are made from an antistatic compound, chemically bound into the bottom components, capable of dissipating an electrostatic charge in a controlled manner. The test criteria are 106 to 108 Ohms. Note that SD footwear without toe protection will not have sole protection certified by CSA.

For any industry where a static discharge can create a hazard for workers or equipment.

Red rectangle with black "C" and grounding symbol indicates soles are electrically conductive. The outer soles are made from a conductive compound that is permanently bound to the bottom components to provide electrical grounding of each foot. Test criteria are 0 to 500 000 Ohms.

For any industry where static discharge may create a hazard of explosion.

MARKING

The right foot of each pair bears the following information permanently marked in a conspicuous location:

- Manufacturer's name, trade name, or CSA Master Contract number
- Date of manufacture by month and year or by date code
- Outsole construction style or name

METATARSAL PROTECTION

Metatarsal Protection is intended to safeguard the upper foot (metatarsal bones) and toe areas. To meet CSA design requirements the footwear must provide sufficient width and height to cover the dorsum of the foot. Note that there is no CSA certification for metatarsal protection as the standard does not currently contain performance requirements.

FOOT GUARDS WITH RUBBER TOE

Foot guards are metal shields worn over shoes for maximum protection to the entire foot - instep as well as toes - against falling, rolling, or flying objects or accidental tool blows.

They are designed to withstand an impact of 75 ft-lbs. with a large safety factor designed in. Foot guards fit any shoe (no rights or lefts), with 5" (average) and 5 1/2" (large) widths.

They are light enough to be worn comfortably all day. To keep the guard properly positioned, it has a rubber toe clip, crossbar, and a one-piece rubber strap with a tension buckle.

HEAT STRESS METERS

- Wet Bulb Globe Temperature (WBGT) considers the effects of temperature, humidity and direct or radiant sunlight
- Heat stress index measures how hot it feels when humidity is combined with temperature, air movement and radiant heat
- Black Globe Temperature (TG) monitors the effects of direct solar radiation on an exposed surface
- In/Out function displays the WBGT value with or without direct sun exposure
- View individual temperatures or indices in either °F or °C
- User adjustable WBGT threshold with audible alarm if threshold is exceeded
- Built-in RS-232 and USB interface
- Tripod mount design for long term monitoring

EVAPORATIVE SERIES

Ergodyne's Chill-Its® Evaporative Series cooling products work hard to provide up to four hours of cooling relief.

The secret? Two different cooling technologies: a hyper-evaporative cooling towel fabric that retains water while remaining dry to the touch, and space age acrylic polymer cooling crystals that expand and absorb water to provide a cooling sensation.

CHILL-ITS® 6700 COOLING BANDANAS & 6710 COOLING TRIANGLE HATS

- Soak in cold water to activate
- Remains hydrated up to four hours
- Activated cooling polymers bring cooling power where you need it most to fight heat stress and fatigue
- Reusable, just re-soak

EVAPORATIVE SERIES (CONTINUED)

Ergodyne's Chill-Its® Evaporative Series cooling products work hard to provide up to four hours of cooling relief. The secret? Two different cooling technologies: a hyper-evaporative cooling towel fabric that retains water while remaining dry to the touch, and space age acrylic polymer cooling crystals that expand and absorb water to provide a cooling sensation.

CHILL-ITS® 6602MF MICROFIBER COOLING TOWELS

- Microfibre material is soft and absorbent
- Super-evaporative, feels significantly cooler than ambient air
- Non toxic and chemical free
- Machine washable
- 2-sided colour, grey on reverse
- Size: 9.8" x 40.9"
- UPF 50 for protection against harmful UV

HEAT STRESS PREVENTION

SQWINCHER® PROFESSIONAL GRADE HYDRATION

Research shows that a high number of work-related accidents are attributed to "bad judgement" or failure of safety equipment, when in reality, heat stress and fatigue may actually be the cause!

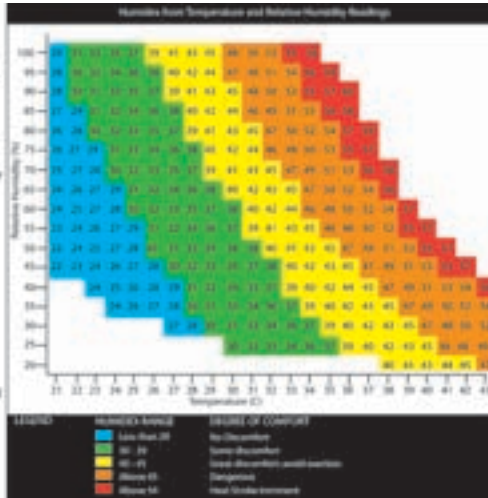

FACT - Sqwincher® sports rehydration drinks help prevent injuries related to heat stress. Sqwincher® is scientifically formulated to replace important body salts and fluids lost through dehydration and provides a supplemental source of energy while quenching thirst in a great tasting way.

HEAT INDEX 82° - 89°
Sun strokes, heat cramps and heat exhaustion are possible with prolonged exposure and physical activity.

HEAT INDEX 90° - 94°
Sun strokes, heat cramps and heat exhaustion are likely. Heat strokes possible with prolonged exposure and physical activity.

HEAT INDEX 95° OR HIGHER
Heat stroke or sun stroke imminent.

HOW TO USE THE HEAT INDEX:
1. Across the bottom (air temperature) locate today's predicted high temperature.
2. Down the left hand side (relative humidity) locate today's predicted humidity.
3. Follow across and down to read "Apparent Temperature" or "What It Feels Like".

HYDRATION FACTS

- Up to a quart of body fluids can be lost during a 1-hour work period. One quart = 32 oz.
- When the first sign of thirst develops, a worker is approximately 3% dehydrated which can reduce their overall work performance by up to 15%.
- In the summer, many workers are working in temperatures in excess of 110°F (43°C). In these temperatures, the body will deplete its electrolyte levels dramatically.

SQWINCHER® VERSUS WATER

- While water can quench mouth thirst, it cannot immediately restore body thirst.
- Dehydration occurs in a variety of forms and depletes muscle cells of electrolytes, important minerals and body fluids, which weaken the cells and keep them from functioning normally.
- Water is absorbed slowly from the stomach and cannot be retained in the extra-cellular cavity where dehydration has occurred.
- Sqwincher® is isotonicity formulated and goes to work 98% faster than pure water and restores electrolytes to the muscle cells within seconds of drinking. In the process, energy levels are restored.

CONSEQUENCES OF FLUID LOSS & NEGLECT OF FLUID BALANCE

Fluid Loss	Result
2%	Impaired Performance
4%	Muscular function and capacity decline
6%	Heat exhaustion
8%	Hallucination
10%	Circulatory collapse and heat stroke

CLASSES OF FIRE:

Fires are classified according to the material that is burning. Fire extinguishers are rated by the area each will cover for a particular class of fire. The higher the number, the bigger the fire area you can fight.

Note: Maintenance and recharging of all fire extinguishers should be performed by a qualified service company.

CLASS A fires are the most common. They involve ordinary combustibles such as wood, paper, cloth, rubber, a number of plastics, and other ordinary materials.

CLASS B fires are caused by gasoline, grease, oil, paint and other flammable liquids. Commonly strikes in warehouses and manufacturing plants.

CLASS C for live electrical equipment. Often occurs in computers, monitors, wiring and appliances.

AN INFORMED CHOICE IS ALWAYS THE BEST CHOICE

CONSIDER THE FOLLOWING WHEN MAKING THE SELECTION THAT IS JUST RIGHT FOR YOU:

1. Type of chemical being stored
2. Applicable regulations
3. Capacity needed
4. Type of container being stored
5. Door and handle style preference
6. Warning label system
7. Performance testing (3rd party approvals)

APPLICABLE REGULATIONS & APPROVALS

THIRD PARTY TESTING IS YOUR ASSURANCE OF PERFORMANCE.

CODE COMPLIANCE:

Federal, provincial and local regulations may apply. Contact your local fire department for guidance.

OSHA 29 CFR 1910.106 / NFPA Code 30 Section 4.3.3

CONVENIENCE & PROTECTION FACTORS

DOOR STYLE PREFERENCE:

Whereas door style is usually chosen by preference, the Uniform Fire Code (UFC) mandates the use of self-closing cabinets. Cabinets with self-closing and self-latching doors provide an extra measure of protection.

MANUAL

Economical manual close doors permit doors to open a full 180°. When pushed closed they will automatically self-latch.

SLIDING

A single bi-fold, sliding door glides smoothly on a spring loaded track for easy, one handed access to cabinet contents. It self-latches and self-closes, and is equipped with a fusible link to hold the door open during use and melts at 165°F (74°C) to automatically close door under fire conditions.

SELF-CLOSE

This style self-indexes, self-latches and self-closes to automatically shut doors upon release. Mechanism is concealed in the top wall, maximizing available shelf space. Fusible links hold doors open during use. In the event of a fire, fusible links will melt at 165°F (74°C) to automatically close doors.

All Justrite® cabinet doors feature a continuous piano hinge for smooth operation, a three-point closure with keyed lock and our exclusive self-latching mechanism on all door styles.

DOOR HANDLE:

SURE-GRIP® U-LOC™ HANDLE

Attractive, self-latching paddle style handle offers easy fingertip access to contents. Flush-mounted design keeps aisles clear and reduces dangerous "catches" from passing traffic. Exclusive padlock tag offers added security. Padlock serves as a visual deterrent and provides the flexibility of the lock being master keyed, keyed alike or keyed different for convenience.

REFLECTIVE WARNING LABELS:

HAZ-ALERT™ SYSTEM

When illuminated with a flashlight, hazardous warning labels burst with high visibility under fire conditions or power outages. Labels are strategically positioned in high and low zones to help firefighters easily locate volatile liquids.

TYPE OF CHEMICAL TO BE STORED:

Using colour and labelling in your storage practices helps identify, organise and segregate liquids. It also helps fire department personnel recognise hazards when responding to fire situations.

CAPACITY NEEDS:

A wide variety of code compliant Justrite® cabinets are available in sizes ranging from 4 gallons US (15 litres) to 120 gallons US (454 litres). Smaller cabinets allow solvents to be stored at worksite locations saving costly trips to a central storage room. Undercounter, wall mount and compact style cabinets add to safe storage, even when space is at a premium. For high capacity storage, larger sized cabinets designed specifically to house 30 gallon US (114 litres) or 55 gallon US (208 litres) US drums are available.

PERFORMANCE TESTING:

Justrite® cabinets are third party tested by Factory Mutual Research and/or Underwriters Laboratories and built to OSHA/NFPA standards.

A SELF-LATCHING CABINET MAKES A DIFFERENCE!

A self-latching door and handle is critical as it does not require the user to manually rotate a handle to ensure the three-point latch is properly engaged. This is an important detail since an unlatched cabinet leaves the flammable contents exposed to a potential fire, where every single second of protection counts. A safety cabinet must be latched for it to perform according to code, providing maximum safety under fire conditions. A stainless steel bullet latching system offers optimum longevity with increased heat resistance.

SURE-GRIP® EX SPECIALTY CABINETS

STORE SMALLER QUANTITIES NEARBY!

When storing smaller quantities of flammable liquids at a work station or adding to existing storage capacities, specialty cabinets make it possible to store flammables safely even when available space is at a minimum. These cabinets offer U-Loc™ handles and come with a double key set or accept an optional padlock for greater security. Chemical resistant powder coat paint resists corrosion for years of service. They also have Haz-Alert™ reflective warning labels to offer visibility under dark conditions. Meet NFPA and OSHA regulations.

TYPE I POLYETHYLENE SAFETY CANS

Choose type I nonmetallic safety cans when dent and chemical resistance are important. Type I safety cans constructed of high-density polyethylene offer distinct advantages over steel units.

- Dent, chip and puncture-resistant polyethylene stands up to harsh corrosives
- Current carrying carbon insert grounds the opening and flame arrester
- Self-close spout and pressure relief mechanism
- Flame arrester prevents ignition sources from entering the can
- Stainless steel hardware provides chemical protection
- FM approved

DISPENSER BOTTLES

Dispense flammable liquids and solvents safely without waste or exposure.

- Small size allows for easy, one-handed dispensing of liquids directly onto work surface
- Brass dispenser valves are leak-proof and self-closing
- Minimizes spills and waste
- Bottle design is textured for firm gripping
- FM approved for flammables

DISPENSING SQUEEZE BOTTLES

Allow safe dispensing of liquid small components or sub-assemblies with a minimum of over-spray. Squeezing the bottle produces a fine stream of liquid.

- Low-density polyethylene with stainless steel wire that allows stem to be shaped to reach hard-to-reach areas

ULTRA-SPILLDECK BLADDER SYSTEMS

- Hidden containment bladder automatically unfurls to capture large spills or drum leaks
- Low profile, rugged, double layer polyethylene containment decks
- Low 5" deck height allows safe and convenient drum loading, even without drum handling equipment
- Meets EPA container storage regulations 40 CFR 264.175 and Uniform Fire Code Spill Containment regulations

Note: SpillDecks do not require usage of the bladder attachment to meet EPA and Uniform Fire Code regulations. Require adequate aisle space to allow the bladder to unfurl properly.

SPILL CONTROL MANAGEMENT

ECOPOLYBLEND™ SPILL CONTROL PALLETS

THE FIRST AND ONLY SPILL CONTROL LINE MADE OF RECYCLED POLYETHYLENE!

- Eco-friendly pallets are made of up to 100% recycled polyethylene, making them twice as good for the environment!
- They not only protect against groundwater contamination, they also utilize post-industrial material that might have otherwise been discarded into the waste stream
- Quality engineered with a robust design, pallets withstand the toughest environments for superior spill control
- Durable, UV-protected EcoPolyBlend™ polyethylene is nearly impervious to chemical attack from hazardous acids, caustics and solvents
- Seamless construction eliminates leaks even if a 55-gallon (200 L) drum fails and completely empties its contents
- Fully compliant, Justrite® EcoPolyBlend™ Pallets feature oversized leakproof sumps that meet or exceed regulations
- Sturdy, removable grates are nearly 2 1/2" (64 mm) thick for superior crack resistance
- Self-locating, they reduce the chance of grate "ride-up" and remove for quick sump inspection and cleaning
- 2-drum and 4-drum square pallets include wide forklift pockets for easy relocation
- Square pallet may be equipped with an optional ramp to facilitate loading and unloading of heavy drums

Yellow = For high visibility or liquid segregation when desired; material content consists of virgin poly sumps with 100% recycled grates resulting in a total of 35% recycled content.

Black = Are made of 100% recycled material. Their dark color camouflages dirt and keeps workplaces looking clean.

ECOPOLYBLEND™ ACCUMULATION CENTERS

THE ONLY SPILL PLATFORMS MADE FROM RECYCLED POLYETHYLENE!

- Get reliable, high performance spill control and help reduce landfills by using recycled products
- These economical, low profile secondary containment platforms are eco-friendly made of up to 100% recycled, post-industrial, durable polyethylene that might have otherwise been discarded into the waste stream
- Long lasting EcoPolyBlend™ polyethylene is nearly impervious to chemicals, including acids and corrosives
- Accumulation centres feature a seamless design to ensure any leaks or spills are captured in the sump, before they reach floor drains or create a slip hazard
- Sturdy grates are nearly 2 1/2" (64 mm) thick for superior crack resistance
- Self-locating, they reduce the chance of grate "ride-up" and remove for easy cleaning
- Modular centres offer the ability to create a customized system
- As capacity needs increase, use optional joining clips to firmly lock units together and expand storage space
- Sumps remain separate and clips can be removed for easy repositioning
- In applications calling for a continuous sump, optional Sump-to-Sump™ drain kit (includes joining clips and transfer tube), allows centers to be joined together on-site for full compliance to EPA and fire codes when combined sump capacities need to meet 66 gallons (250 L)
- Optional companion ramp facilitates movement of heavy drums and features anti-skid ribs for maximum safety
- It can be located anywhere on any 2-drum or larger centre

A GUIDE TO EMERGENCY EYEWASH & SHOWER EQUIPMENT

Emergency showers, eyewashes and tepid water delivery systems are required to provide emergency treatment in preventing permanent eye and skin damage from accidental exposure to chemicals, biohazards or airborne debris.

In the absence of a uniquely Canadian standard for the design and placement of emergency eyewash and shower equipment, provincial authorities in all jurisdictions in Canada refer to the ANSI Z358.1 standard for recommendations and enforcement regarding emergency eyewash and shower requirements.

Emergency drenching fixtures must be readily accessible for use in manufacturing, laboratories, refineries, mines, construction sites and wherever workers may be accidentally splashed or sprayed with injurious solvents, acids, harmful particulates and, in some cases, biological hazards.

SEE PAGE 721 FOR MORE INFORMATION ON TEPID WATER DELIVERY SYSTEMS

KEY REQUIREMENTS FROM THE ANSI STANDARD Z358.1 INCLUDE:

- Device must be positioned within 10 seconds (55') from hazard
- Device must activate in one second or less
- Device must be capable of delivering minimum flow of flushing fluid for at least 15 minutes*
- Device must provide "tepid" water (16-38°C, 60-100°F)
- Device must be activated weekly to remove dust/debris
- There must be no obstruction in the pathway to the device
- The water supply uninterrupted at the valve
- Device must be identified with highly visible signage
- Device must be well lighted
- Device must be fully inspected annually

*** Because of the limited quantity of fluid they contain, supplemental eyewash devices alone (such as bottled eyewash) cannot meet the 15 minute flushing requirements in the ANSI standard. These should be used for initial first aid only to treat a patient during the path to certified eyewash. You should never substitute a fully compliant eyewash station with supplemental devices.**

Safety flushing devices are not a substitute for primary personal protective devices such as proper eyewear and clothing. Chemical MSDS' dictate proper first aid measures in case of accidental exposures.

Depending on site conditions and severity of the hazard, emergency eyewash and shower devices are found in various forms including:

- Plumbed-In
- Enclosed Safety Showers
- Portable
- Laboratory
- Tempering Systems
- Supplemental Devices

EMERGENCY EYEWASHES & SHOWERS

PLUMBED-IN EYEWASHES & SHOWERS are designed to direct a fixed water source to eyes, face or body in emergencies. Wall mount or pedestal-mounted eyewashes and eye/face washes should be located nearest the point of need but no more than 10 seconds (55') from the hazard.

HALO™ WALL MOUNT EYEWASH STATIONS

- Features antimicrobial protection, integral strainers, and rugged safety-yellow powder coating for easy visual identification in an emergency
- Aquaduct™ self-draining design eliminates bacteria growth from standing fluid
- Eye/face wash models provide industry leading 85% facial coverage
- Activate by push handle or by lifting dust cover
- Optional see-through dust cover (shown) makes inspection simple and keeps device free of debris and ready for use
- Stainless steel models are ideal for corrosive, high abuse environments
- Wheelchair accessible
- Arrives fully assembled
- ULC certified to ANSI standard Z358.1

IMPORTANT:
Regulations require tepid water (18-37°C). See page 721 for water tempering devices

EMERGENCY EYEWASHES & SHOWERS

COMBINATION SHOWER & EYEWASH FIXTURES pair-up eyewash with emergency showers when the MSDS calls for both eye and skin irrigation. To accommodate various site conditions, combination units provide several options including: Stainless components, PVC, foot-treadle operation, anti-scald or anti-freeze valves and freeze-protected heat trace units.

HALO™ COMBINATION EMERGENCY SHOWER & EYEWASH STATIONS

- Combine Halo™ eyewash technology with SpinTec™ shower features for high performance safety installations
- SpinTec™ showers yield superior fluid distribution
- Durable ABS plastic showerhead
- Compact profile means less in-plant damage
- Features antimicrobial protection, integral strainers, and rugged safety-yellow powder coating for easy visual identification in an emergency

EMERGENCY EYEWASHES & SHOWERS

LABORATORY, FAUCET-MOUNTED & SWING-AWAY EYEWASH & SHOWER FIXTURES are uniquely designed for indoor environments where space is at a premium, including healthcare, university, and the QC lab. Product solutions include swing-activated units, faucet-mounted eyewash stations, and combination fixtures; all designed to provide the safest possible lab environment.

FAUCET-MOUNT EYEWASH STATIONS

- Cost effective solution for applications with an existing faucet
- Now lead-free
- Cost effective product mounts on existing standard or goose-neck faucets
- Twin spray heads include a flow control and pop-off dust covers
- One second/one-step activation
- Use horizontal pin for normal hand or ware washing
- Pull button for eyewash
- Includes a safety sign and inspection tag
- Weight: 1 lb.
- SEI certified to ANSI standard Z358.1

Model No. SAK621

EMERGENCY EYEWASHES & SHOWERS

WATER TEMPERING PRODUCTS are designed to meet ANSI standard Z358.1 requirements to deliver "tepid" water to injured workers. In addition to discouraging use of a safety flushing device, a 15-minute deluge of cold water to the injured worker can negatively affect core body temperature, and hypothermia can result. Therefore, ANSI standard Z358.1 requires emergency showers and eyewashes to deliver "tepid" water. ANSI defines "tepid" water as 15.6°C to 38°C (60-100°F). Tempering solutions include steam, instantaneous (on demand) heaters and thermostatic mixing valves (TMV's). TMV's blend hot and cold water to meet strictly specified water temperature ranges.

EMERGENCY FIXTURE TANKLESS WATER HEATERS

- Performs when needed and quickly provide an unlimited supply of warm water
- Reaches the ANSI standard Z358.1 requirements for tepid water temperatures in as little as 20 to 30 seconds
- Patented temperature control system and multiple safety features like internal fusing, digital temperature control, Incoloy 800 sheathed heating elements to eliminate the "tingle" effect, and an externally mounted emergency stop button
- Precision engineered for optimal performance
- Features rugged industrial components from high quality copper and brass tested to 300 PSI, to increase the life of your heater
- Large internal passageways engineered into every heater minimize pressure drop, so there will be no large temperature swings; if the water flow changes drastically, you will not have to be concerned with scalding
- Easy to install anywhere – all you need is access to one electrical connection and a cold water line
- Splash proof NEMA 4 enclosures are constructed for either indoor or outdoor use
- These energy efficient heaters perform on demand and only require water and power once activated
- No mixing valves required

AXION® STEAM WATER HEATERS

- Replaces hot water tanks when pressurized steam is available
- When an emergency shower or eyewash is activated, the flow of water opens a steam control valve
- Steam enters the heat exchanger, heating the water, and a mixing valve blends the hot and cold to produce tepid water (80°F/27°C)
- Additional valves keep the system preheated, freeze protected and scald protected
- The steam valve will remain closed should there be a loss of water pressure
- 24 GPM @ 25 PSI

EMERGENCY EYEWASHES & SHOWERS

PORTABLE EYEWASHES provide self-contained fluid where plumbed water is not available. Gravity-fed or pressurized portable eyewash systems should deliver the ANSI minimum 15-minute safety eyewash drench. To keep water stored in these portable systems safe for ophthalmic use, an antibacterial agent is included or available separately. These units often can be freeze protected for outdoor applications.

ON-SITE® GRAVITY-FED EYEWASH STATIONS

- Ideal for locations where a plumbed water source is not available
- High-visibility yellow, moulded pedestal and tank
- Transparent tank allows solution level to be checked easily
- Hinged eyewash tray activates in one quick motion
- Stainless steel clamps secure the tank during transport
- Vandal-resistant unit: foreign objects cannot be introduced into tank because all openings are sealed once the tank is installed
- One of the lightest portable eyewashes on the market
- SEI certified to ANSI standard Z358.1
- Includes wall bracket (can also deck mount)

SAK610

EMERGENCY EYEWASHES & SHOWERS

SUPPLEMENTAL EYEWASHES include bottled eyewash and other devices that do not meet 15-minute drench criteria. These supplemental solutions are designed to treat nuisance hazards and/or as an initial first aid to injured workers during the path to certified eyewash, but they do not meet the 15 minute drench criteria of the ANSI standard Z358.1. Bottled eyewash is designed to be positioned close to the point of need. Acceptable for immediate first-aid, bottled eyewashes should support, but not substitute, a primary eyewash or shower unit.

SALINE EYEWASH BOTTLES

- Contains a buffered saline solution that is sterile and superior to tap water for emergency eye care
- Blow-Fill-Seal (BFS) bottle is tamper resistant, and maintains the sterility and integrity of the eyewash
- Easy to remove and open in emergency situations
- 1, 4, and 8 oz. bottles have user controlled delivery, delivering drops or an irrigating stream of solution, depending on the squeeze pressure applied to the bottle
- Trilingual instructions (English, French and Spanish)
- Does not meet ANSI standard Z358.1 15-minute flushing requirement

Regulations change on a continuing basis. Requirements vary from jurisdiction to jurisdiction and are dependent on a number of factors including (but not limited to):

- Maximum number of employees at the work site (or per shift)
- Location of the place of employment/industry
- Type of industry and potential hazards
- Proximity or travel time to a medical facility

FEDERAL REGULATION FIRST AID KITS

Common federal employers include the following interprovincial and international industries:

- Banks
- Railways, highway and air transport
- Ferries, tunnels, bridges and canals
- Telephone and telegraph systems
- Pipelines
- Radio and television broadcasting and cable systems
- Shipping and shipping services
- Employment in the operation of ships, trains and aircraft
- Licensed grain elevators, and certain feed mills and feed warehouses, flour mills and grain seed clearing warehouses, flour mills and grain seed clearing plants
- Federal public service and persons employed by the public service and Crown corporation and agencies
- Indian reserves
- Exploration and development of petroleum on lands subject to federal jurisdiction
