

Compact Operating Semi-rigid Ureterorenoscopes by Bichler

2 operating channels and 45° oblique eyepiece

- ❑ High density fused quartz fiber optical bundles provide brilliant rod lens-like images
- ❑ Perfect vision with continuous irrigation via 2 separate operating channels
- ❑ Stone therapy with laser, ultrasound, electrohydraulic or mechanical lithotripsy
- ❑ Use of flexible accessory instruments or two different instruments such as laser light guide or electrohydraulic probe and stone basket to stabilize the calculi
- ❑ Rigid accessory instruments may be used through the straight operating channel

9
