

When we say a “political ideology”, what we mean is an ideology that is primarily designed to control and subjugate others. That would include you, your friends and your family. Now, since you don’t actually see the manifestations of this political ideology in day-to-day life, you may be inclined to believe it doesn’t exist here. However, all anyone of average awareness needs to do is simply look at other societies where Islam has at least a 5% share of the population. In every society, including those in Westernized countries, Islamic believers are systematically disassembling the host cultures by continuously demanding more and more accommodation and change until they have established defacto “no-go zones” where even police are afraid to go. If you are thinking this sounds crazy, you are right. Unfortunately, every word on this page is provable with thousands of credible resources and on-the-ground videos.

Starting at about 1-2% of the population, the demands begin. Until that time, their teachings tell them to “go with the flow” until they are stronger in numbers. In the U.S., you are now seeing what a 1-2% Muslim population looks like. If you have been alert, you may have noticed that it now seems to be that Islam is constantly in the news. You can’t get away from it. As Muslims become more empowered by the host culture giving in to their demands, they begin to agitate for more and more until they demand segregated environments such as we are now seeing in Dearborn, MI where Christians have actually been stoned in large groups as the Muslim-dominated police force stood by and did nothing. These events and others that have violated the U.S. Constitution in favor of Shariah law have already prompted many First Amendment lawsuits.

You may be asking, “If all of this is really true, why is it happening?” The answer is simple. The Islamic believers that are coming to the U.S. are mostly coming in from majority Islamic countries. Religion and the state are one there. Islamic law requires that everyone conform to the same set of norms. Everyone – without exception. In addition, every Muslim is required to enforce the code. This “religious ethic” is literally beat into them from day 1, and the brainwashing continues all through life by virtue of the five prayers per day requirement (*which incidentally, condemns all Christians and Jews*) Unfortunately, you will also find that all of your “moderate” real Muslim friends are saying the same “hate prayers” five times a day as well.

Contrary to what the U.S. government wants you to believe, these Islamic believers are not coming here to assimilate and support U.S. Constitutional principles; instead, they are coming here to get what you already take for granted – a good life in a land of milk and honey. However, they have no intention of giving up their own culture to do so. And, since the U.S. does nothing to encourage assimilation, they segregate and work tirelessly to Islamize the entire society. Sure, some backslide and start enjoying the good life too much, but not the majority. It is also important to note that unlike the West, societal class is meaningless in Islam. Overall, Muslims operate using principles more aligned with the principals of “group think”, functioning as the collective, much like “the Borg” in the fictional Star Trek movies. This is why you see Muslim doctors with PhDs willing to strap on bombs and commit suicidal jihad - like in this example http://en.wikipedia.org/wiki/2007_Glasgow_International_Airport_attack .

As we clearly see from a quick reading of [The Clash of Civilizations and the Re-making of World Order](#), Islam has never, in over 1400 years, been able to get along with any of its neighbors no matter what country has hosted them. We begin to easily see why when we actually read the Islamic “holy” books. Here is what we find after careful analysis:

- 1) In the Qur’an, about 65% of it is devoted entirely to the management of others (*Kafirs, as they derogatorily call all non-Muslims*),
- 2) In the Sira, (*Mohammad’s biography*) over 75% of the text is devoted to the management of Kafirs. Does that sound like a religion to you?
- 3) In the Hadith (*the traditions of Mohammad to be mimicked by all Muslims*), every detail of how **all** humans are to live their lives is spelled out – from what foot is required to enter the restroom, to how many sips of water to take when drinking a glass of water. To see all of the detail for yourself, pick up a copy of [Reliance of the Traveller: A Classic Manual of Sacred Islamic Law](#) This is THE authoritative resource on Islamic practice, according to Islamic scholars.

But, don’t misunderstand, Muslims will say, as they quote from the Qur’an: “*there is no compulsion in religion*”. And, while this is actually true, it is only true from a purely technical point of view. They conveniently forget to mention that there are only two other choices if you do not wish to convert to Islam. They are:

:

- 1) Pay a special poll tax (as a *Dhimmi / 2nd class citizen and live a harassed life as all non-Muslims in all Islamic-majority countries do*) or
- 2) Be killed.

Critical Note:

Although Americans and most members of other societies do not live in the past, nearly all orthodox Muslims do. History is everything to Muslims. Global conquest is the goal, no matter how many get hurt or how long it takes. Most Westerners just can’t relate to this. However, if you fail to understand this one simple point, you will never understand the truth of Islam that will continue to negatively affect your freedoms and especially those of your children.

Conclusion

If you have found this section intriguing, begin your journey by watching a few lessons on how we got to this point. Then, move on to the simple-to-understand Shariah law primer for non-Muslims. Finally, as your knowledge increases, move on to the other resources available at this website and learn how to share your newfound knowledge with others.
