

EFC-2000 DIN Waveform Corrector: Din Rail Applications

Finally the industry's most powerful filter is available in a convenient din rail enclosure. The **EFC-2000** DIN offers waveform correction technology for all din rail applications. This provides filtration, waveform correction for other din rail technologies such as motor controls, conveyor control applications and PLC's.

THE EFC-2000 DIN:

ABSORBS, DISSIPATES & REMOVES

- Transient voltage surges and spikes
- Frequency Noise Between 3kHz-1MHz
- Ring waves

DOES NOT SHUNT ENERGY TO GROUND.

The facility ground is not relied on for performance or survivability.
