It is possible for a team to have more than 4 players who qualify to play in the tournament. (meaning more than 4 players who have played at least 1/3 of the time).

If a team has more than 4 players who want to play in the tournament, each player needs to have paid the full amount into the tournament. ($\$3 \times 14 \text{ weeks} = \42 each), (each week you pay $\$7$. $\$4$ of that goes into the team prize $\$$ & $\$3$ of it to the tournament prize $\$$). So it's $\$42$ extra per each player over 4 that a team would like to enter.

This prevents someone from paying the minimum number of weeks (5 weeks = $\$15$) and then winning the money of all of the other players who have paid the full $\$42$

If you have more than 4 players who qualify & want to play, your team owes the extra $\$42$ per extra player. You must state which 4 (or more) from your team will be playing before the end of the regular schedule. If anyone is confused about this please contact Lynn.
