Accredited Training Programs Catalog

## TABLE OF CONTENTS

MESSAGE FROM OUR CEO

Bryan Wollam

Dear professional colleagues and friends,

I would like to take a moment and thank you for entrusting your education, training and competency requirements with Wollam Groups. There are a lot of training organizations, but Wollam Groups remains the only accredited training provider in the petroleum & natural gas industry globally. While we are very proud of our heritage and grassroots in the petroleum & natural gas industry, we service all industry segments and work with universities, trade organizations, regulatory agencies and the private and public sectors to help them achieve their education, training, and competency goals.

Our Training Programs and Certifications

All the programs in this catalog are accredited. They are unlike any other training course in the industry. Each program takes approximately 3,500 man hours to develop and complete the approval process. Our programs start with a needs analysis with the industry in which we are serving. This is followed by a detailed course design that undergoes an extensive review and approval process. This is followed by development, and an extensive red team process

made up of external experts to ensure all interested parties identified in our needs analysis have been represented, and the training meets their needs. Once this is completed, we are required to conduct three (3) pilot studies with our accredited trainers to validate the design and determine the Continuing Education Units (CEUs) granted. All of the above, often results in changes which undergoes a thorough change process, review, and re-approval. Upon completion, we offer the accredited CEUs. Accredited training organizations, like Wollam Groups, can certify an individual to specification, such as API Q1, API Q2 or a product specification. We have undertaken an extensive qualification process to ensure every one of our programs meet these extensive requirements, and we are authorized to certify individuals. This catalog is constantly evolving as we have a team of educators, industry experts, course designers working on new programs based on industry needs.

Our Accredited Instructors

Each and every one of our instructors undergo one of the most extensive competency qualification processes in the education industry. Each instructor is required to have a minimum of 10 years of industry experience. In addition, they must be a certified IRCA Auditor for the industry in which they are teaching. Once these basic requirements have been fulfilled, they must undergo a competency validation process which requires demonstration of actual knowledge, implementation, and evaluation against the subject matter being taught under our Advisory Division.   Once the above have been accomplished, they complete a trainer application which includes a validation of qualifications. Upon application approval, they start their training qualification process, consisting of more than a half dozen teaching sessions under the direction and supervision of one of our accredited instructors. In addition, they receive an extensive IACET trainer evaluation by our master educators who hold master degree and Ph.D. in education. We are the only training organization that has such a robust competency qualification process for instructors and this is how we ensure each of our participants leave with the knowledge and understanding that they entrusted Wollam Groups to provide.

Global Recognized Expert

All our programs include hardbound textbooks for our facilitators, state of the art participant workbooks, practical applications, case studies and industry models to reinforce the subject matter being taught. Our instructors are deemed competent and qualified to conduct competency assessments on each participant, which is in part why we certify individuals.   In addition, trade organizations, universities, private and public companies come to us to develop their programs; for example, we developed API-U API Q1 and Q2 Fundamentals and Practitioner Programs.

Professional Credentials

Upon completion of any of our accredited programs, each of our participants receive the certifications, which includes a Registered Professional Number (RPN™), leather bound credentials stating their earned designations and accredited Continuing Education Units (CEUs). In addition, they may elect to receive their wallet license with electronic credential verification services (CVS), which shows their identity and qualifications simply by holding the license in front of any smartphone.

4

Method of Training

Wollam Groups has invested heavily in our state of the art training facilities for in-class instruction. In addition, we invested in technology that allows us to have participants join our traditional classes virtually, known as PetroWise™. During the course, the participants are with a live instructor, and interact with other participants around the globe. All practical application activities, exercises and breakout sessions are conducted through our virtual classroom. Every one of our web programs receives the same accreditation as our in-class courses. Wollam Groups also offers private training where our instructors are assigned to companies for routine training or for one time courses. For private training, we utilize the client's facilities to conduct the programs. We now have exclusive partnerships with the industry's best training organizations and offer classroom training programs throughout North America, South America, Middle East, Caspian Region and Europe.

## IACET EXEMPLAR TRAINING ORGANIZATION OF THE YEAR!!

In 2016, Wollam Groups was selected by the IACET Award Committee as the winner of the "Exemplar Training Organization Award, IACET's most prestigious award. This award honors exemplary, results-oriented programs that have demonstrated significant and relevant impact on the populations and industries served. We are truly honored and humbled to receive such a prestigious award, competing against major universities, private and public training companies around the globe. Wollam Groups' decision to become accredited to IACET was not an easy one, but one that we knew our clients expected. We do this to ensure participants receive the highest level of training available. We are pleased to bring our award-winning accredited training programs to the petroleum & natural gas industry.

For those that have completed any of our programs know the quality that we provide and why thousands trust their training and competency to us each year. After reviewing our catalog, if there is an interest in course, click on the embedded link to open the specific course brochure. For more information, please contact us at info@wollamgroups.com or contact our Education Division by sending an email to Natalie Schwab at natalieschwab@wollampag.com.

5

Wollam Groups' training programs are fully accredited and back by IACET, who was founded by the Department of Education and accredited through ANSI.

Petroleum & Natural Gas Quality Practitioner (Course Code: WG-002-4)

This course was designed working with the operators for their quality personnel and engineers. It includes the following subjects: quality concepts & principals, quality engineering fundamentals, API Q2 Specification, API Q1 Specification, API Monogram Program, developing, implementing and assessing service quality plans and product quality plans. This course is fully accredited and participants receive their unique Registered Professional Number (RPN™), leather bound credentials and Quality Practitioner designation and 4.0 accredited Continuing Education Units (CEUs).

Lean Six Sigma Series (Course Code: WG-002-5)

The Lean Six-Sigma Series consists of Yellow Belt, Green Belt and Black Belt Training. This series is designed to meet the ASQ requirements while being fully accredited by the International Association of Continuing Education and Training (IACET). These courses are instructed by certified black belts who are also qualified instructors. They are fully accredited and participants receive their unique Registered Professional Number (RPN™); leather bound credentials, Lean-Six Sigma designations and between 2.4 and 16 accredited Continuing Education Units (CEUs) depending on the program completed.

Educational Training Series (Course Code: WG-001-1)

The Education Training Series is not like any other in the industry and has been designed for those who are responsible for developing, maintaining, managing or delivery education, training or competency assessments. This series of training is based around the International Association of Education & Training (IACET) and consists of a Train-the -Trainer Program, IACET Essentials and IACET Practitioner. These courses are instructed under our master educators and includes practical applications, discussion points, case studies and competency assessments. These courses are fully accredited and participants receive their unique Registered Professional Number (RPN™), leather bound credentials, and between 2.5 and 4.0 accredited Continuing Education Units (CEUs) depending on the program completed.

6

API Q1 Professional Series (Course Code: WG-002-1)

This series of courses consist of 1 day Generalist, 3 day Essential, 5 day Professional courses. The courses cover the entire specification and includes practical applications, discussion points, case studies and competency assessments. The courses are fully accredited and participants receive their unique Registered Professional Number (RPN™), leather bound credentials, and between 1.0 and 4.0 accredited Continuing Education Units (CEUs) depending on the program completed. These are the most advanced courses in the industry and are instructed by certified trainers and professionals.

API Q2 Professional Series (Course Code: WG-002-2)

This series of courses consist of 1 day Generalist; 3 day Essential, 5 day Professional courses. The courses cover the entire specification and includes practical applications, discussion points, case studies and competency assessments. The courses are fully accredited and participants receive their Registered Professional Number (RPN™); leather bound credentials, and between 1.0 and 4.0 accredited Continuing Education Units (CEUs) depending on the program completed. These are the most advanced courses in the industry and are instructed by certified trainers and professionals.

Auditing Professional Series (Course Code: WG-002-3)

Our auditing courses are like no other in the industry. They include an in-depth analysis of the specifications from an auditor perspective. We ensure that the standard is not only understood but also the intent and application of the clauses. In addition to the training, the participants put knowledge to use by joining an audit team and conduct an audit against an actual management system to include all of its records and objective evidence or lack thereof. During the audit process, the participants undergo a number of formative and summative assessments (competency) by industry experts, master educators, and certified auditors. Upon completion, audit team reports are evaluated by the audit committee. Upon successful completion, the participants receive their Registered Professional Number (RPN™), leather bound credentials, accredited CEUs and earn Auditor designation.

7
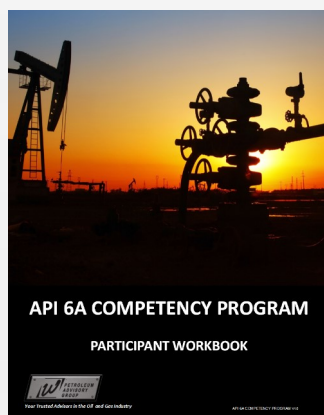

ISO Professional Series (Course Code: WG-003-1)

This series of courses covers ISO 9001, ISO 14001, OHSAS 18001, ISO 45001, ISO 27001 and ISO 31000. Courses for each standard range from a 1 day transition course to a 3 day Practitioner program. They are fully accredited and participants receive their Registered Professional Number (RPN™), leather bound credentials, and between 1.0 and 2.5 accredited Continuing Education Units (CEUs) depending on the program completed.

API Product Specification Series (Course Code: WG-002-6)

This series of courses covers the API product specifications. Each product specification has three courses which includes a 1 day Generalist; 3 day Practitioner and 5 day Professional. These courses range in design from ensuring participants leave with a good understanding of the specification to being technically qualified and competent, depending on the course completed. They are fully accredited and participants receive their unique Registered Professional Number (RPN™), leather bound credentials, and between 1.0 and 5.0 accredited Continuing Education Units (CEUs) depending on the program completed. These are the only accredited product specification courses in the industry and are taken by operators, manufacturers, service providers, drilling contractors, auditors, consultants and government agencies.
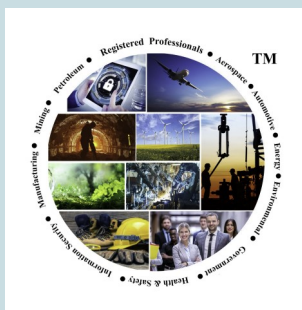

8

Accredited Short Series and Webinars

Our short series programs consist of programs that range from 1 to 4 hours that are instructed in our training facilities, on client locations or through webinars. The programs are all accredited and range from .01 to .5 accredited CEUs. These courses range from executive leadership training on API Q2 to individual topics like contract review, operations planning, risk management, design and development, contingency planning, procurement & critical suppliers, service execution, service quality plans, product quality plans, preventive maintenance and inspection test plans, etc. Our short series range from $95 to $395, making them affordable while meeting the training requirements outlined in the specifications. Upon completion, each participant will receive a PDF electronic certificate of completion, accredited CEUs and a copy of the handouts.

Registered Professional Number

Upon successful completion of qualifying courses, participants will receive an unique Registered Professional Number and be enrolled in the Registered Professional Network™ (RPN). This network includes unique registration numbers for each professional designation received through Wollam Groups and allows the industry to locate registered professionals for their areas of expertise.

PetroWise™

All of our courses are available in both a traditional classroom setting or in our state of the art virtual learning environment, known as PetroWise™. Our virtual training program is done with live certified instructors, as well as allowing our participants to interact with professionals around the globe. For more information click here.

API Q1 Generalist – 1 Day, 1.0 CEU
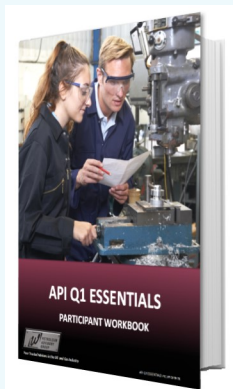

(Course Code: WG-002-1.3)

This course was designed to provide an organization an awareness of the specification. It also meets the requirement for training for support functions, such as procurement, contracts, sales, engineering, demand management, finance, human resources, operations, field coordinators, supervisors, and managers. Upon completion, participants receive 1.0 accredited CEUs and a certificate of completion. This program meets competency as called out in the specification due to the accredited CEUs and knowledge assessment conducted during the course.

API Q1 Essentials – 3 Days, 3.0 CEUs
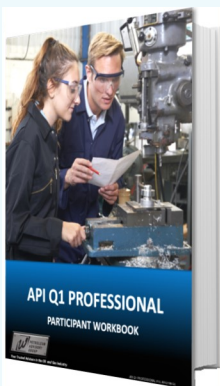

(Course Code: WG-002-1.1)

This course covers the entire specification and includes practical applications, skills assessments, and knowledge checks. Upon completion, the participants receive their Registered Professional Number (RPN™), leather bound credentials and 3.0 accredited CEUs. This program meets competency requirements due to the accredited CEUs, practical applications, skills assessment, and examination. This program is designed for anyone who has a responsibility to deploy, implement or maintain their management systems, to include support functions and operations. For more information click here.

## API Q1 Professional – 5 Days, 4.0 CEUs

(Course Code: WG-002-1.2)

This course is our most coveted course as participants earn the designation of a certified professional. The program is fully accredited and meets the competency requirements called out in the specification. Upon completion, participants receive their Registered Professional Number (RPN™), leather bound credentials, API Q1 Professional designation, license and 4.0 accredited CEUs. This program is designed for quality and HSE personnel, auditors, managers responsible to oversee their management systems. For more information click here.

10

API Q1 Auditor Fundamentals – 2 Days, 2.0 CEUs
(Course Code: WG-002-3.4)

This program covers the entire specification from an auditor's point of view. This is the only course in the industry that not only covers the specification but shows all of the linkages, dependencies, how key definitions are used in the specification and how to audit them. It also includes auditor briefs on all sections on what to look for and how to audit. Upon completion, participants receive their Registered Professional Number (RPN™), leather bound credentials and 2.0 accredited CEUs.

API Q1 Technical Application for Lead Auditors – 3 Days, 2.5 CEUs
(Course Code: WG-002-3.3)

This is the industry's most advanced auditing course and teaches skilled and qualified auditors how to audit the specification, from the corporate office out to the rig site. This includes auditing a full management system with a skilled audit team made up of operators, manufacturers, drilling contractors, lead auditors, and industry SMEs. Upon completion, the audit committee reviews and scores the audit. In order to enter into these program, participants must have completed the API Q1 Essentials or Professional and must have audit experience. If they have not obtained their auditor credentials, then they will also have to complete the API Q1 Auditor Fundamentals prior to entry. This program has been taken by most of the international, national and stated owned operators, and manufacturers. Upon completion, participants receive their Registered Professional Number (RPN™), leather bound credentials and 2.5 accredited CEUs. This program meets all competency requirements due to the accreditation, skills and competency assessment and examination. For more information click here.
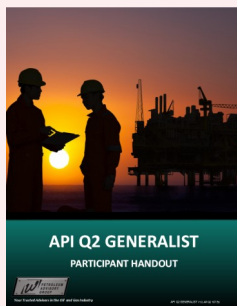

API Q1 Implementation Practitioner – 5 Days, 4.0 CEUs
(Course Code: WG-002-1.4)

This program was developed by working with international oil field companies. The program includes the API Q1 Essentials plus one day on developing and accessing a Product Quality Plan (PQP). This program has been taken by the industry's largest operators and service providers and results in a Registered Professional Number (RPN™), leather bound credentials with the designation of certified API Q1 Implementation Practitioner. The program meets all competency requirements due to the accreditation, knowledge assessments, skills assessment conducted by API Q1 professionals and master educators.

11

API Q2 Generalist – 1 Day, 1.0 CEU

(Course Code: WG-002-2.3)

This course was designed to provide an organization an awareness of the specification. It also meets the requirements for training for support functions, such as procurement, contracts, sales, engineering, demand management, finance, human resources, operations, field coordinators, supervisors, and managers. Upon completion, participants receive 1.0 accredited CEUs and a certificate of completion. This program meets competency as called out in the specification due to the accredited CEUs and knowledge assessment conducted during the course. For more information click here.

API Q2 Essentials – 3 Days, 3.0 CEUs
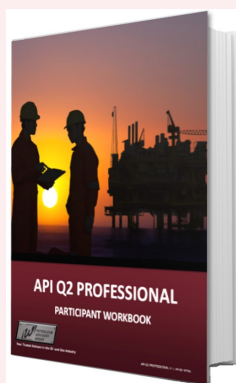

(Course Code: WG-002-2.1)

This course covers the entire specification and includes practical applications, skills assessments, and knowledge checks. Upon completion, the participants receive their Registered Professional Number (RPN™), leather bound credentials and 3.0 accredited CEUs. This program meets competency requirements due to the accredited CEUs, practical applications, skills assessment, and examination. This program is designed for anyone who has a responsibility to deploy, implement or maintain their management systems, to include support functions and operations.
For more information click here.

API Q2 Professional – 5 Days, 4.0 CEUs
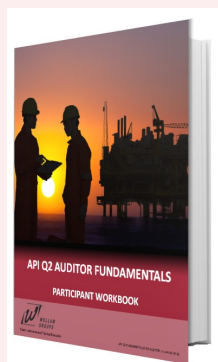

(Course Code: WG-002-2.2)

This course is our most coveted course as participants earn the designation of a certified professional. The program is fully accredited and meets the competency requirements called out in the specification. Upon completion, participants receive their Registered Professional Number (RPN™), leather bound credentials, API Q2 Professional designation, license and 4.0 accredited CEUs. This program is designed for quality and HSE personnel, auditors, managers responsible to oversee their management systems.
For more information click here.

## API Q2 Auditor Fundamentals – 2 Days, 2.0 CEUs
(Course Code: WG-002-3.1)

This program covers the entire specification from an auditor's point of view. This is the only course in the industry that not only covers the specification but shows all of the linkages, dependencies, how key definitions are used in the specification and how to audit them. It also includes auditor briefs on all sections on what to look for and how to audit. The program was assessed by Exxon, BP, Shell, Chevron, Halliburton, Baker, Schlumberger, Transocean. Upon completion, participants receive their Registered Professional Number (RPN™), leather bound credentials and 2.0 accredited CEUs. For more information click here.

API Q2 Technical Application for Lead Auditors – 3 Days, 2.5 CEUs
(Course Code: WG-002-3.2)

This is the industry's most advanced auditing course and teaches skilled and qualified auditors how to audit the specification from the corporate office to the rig site. This includes auditing a full management system with a skilled audit team made up of operators, service providers, drilling contractors, lead auditors, and industry SMEs. Upon completion, the audit committee reviews and scores the audit. In order to enter into these program, participants must have completed the API Q2 Essentials or Professional and must have audit experience. If they have not obtained their auditor credentials, then they will also have to complete the API Q2 Auditor Fundamentals prior to entry. This program has been taken by most of the international, national and stated owned operators, and service providers.
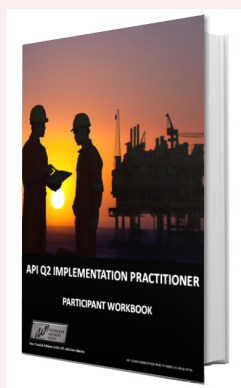

Upon completion, participants receive their Registered Professional Number (RPN™), leather bound credentials and 2.5 accredited CEUs. This program meets all competency requirements due to the accreditation, skills and competency assessment and examination.
For more information click here.

API Q2 Implementation Practitioner – 5 Days, 4.0 CEUs
(Course Code: WG-002-2.4)

This program was developed by working with the international oil field companies. The program includes the API Q2 Essentials plus two days on developing and accessing a Service Quality Plan (SQP). This program has been taken by the industry's largest operators and service providers and results in a Registered Professional Number (RPN™), leather bound credentials with the designation of certified API Q2 Implementation Practitioner. The program meets all competency requirements due to the accreditation, knowledge assessments, skills assessment conducted by API Q2 professionals and master educators.

13

## Auditor Fundamentals – 2 Days, 2.0 CEUs
(Course Code: WG-002-3.5)

This course teaches the fundamentals of auditing to includes: audit planning, open and closing meeting, conducting the audit, developing and an effective audit program, auditor closure and report writing, auditor competencies, leading an audit team, and conflict resolution. Upon completion, the participants receive a certificate of completion, accredited CEUs, and leather bound credentials.

API Q1 Auditor Fundamentals – 2 Days, 2.0 CEUs
(Course Code: WG-002-3.4)

This program covers the entire specification from an auditor's point of view. This is the only course in the industry that not only covers the specification but shows all of the linkages, dependencies, how key definitions are used in the specification and how to audit them. It also includes auditor briefs on all sections on what to look for and how to audit. Upon completion, participants receive their Registered Professional Number (RPN™), leather bound credentials and 2.0 accredited CEUs.

## API Q1 Technical Application for Lead Auditors – 3 Days, 2.5 CEUs
(Course Code: WG-002-3.3)

This is the industry's most advanced auditing course and teaches skilled and qualified auditors how to audit the specification from the corporate office to the rig site. This includes auditing a full management system with a skilled audit team made up of operators, manufacturers, drilling contractors, lead auditors, and industry SMEs. Upon completion, the audit committee reviews and scores the audit. In order to enter into these program, participants must have completed the API Q1 Essentials or Professional and must have audit experience. If they have not obtained their auditor credentials, then they will also have to complete the API Q1 Auditor Fundamentals prior to entry. This program has been taken by most of the international, national and stated owned operators, and manufacturers. Upon completion, participants receive their Registered Professional Number (RPN™), leather bound credentials and 2.5 accredited CEUs. This program meets all competency requirements due to the accreditation, skills and competency assessment and examination. For more information click here.

API Q2 Auditor Fundamentals – 2 Days, 2.0 CEUs
(Course Code: WG-002-3.1)

This program covers the entire specification from an auditor's point of view. This is the only course in the industry that not only covers the specification but shows all of the linkages, dependencies, how key definitions are used in the specification and how to audit them. It also includes auditor briefs on all sections on what to look for and how to audit. The program was assessed by Exxon, BP, Shell, Chevron, Halliburton, Baker, Schlumberger, Transocean. Upon completion, participants receive their Registered Professional Number (RPN™), leather bound credentials and 2.0 accredited CEUs. For more information click here.

API Q2 Technical Application for Lead Auditors – 3 Days, 2.5 CEUs
(Course Code: WG-002-3.2)

This is the industry's most advanced auditing course and teaches skilled and qualified auditors how to audit the specification, from the corporate office to the rig site. This includes auditing a full management system with a skilled audit team made up of operators, service providers, drilling contractors, lead auditors, and industry SMEs. Upon completion, the audit committee reviews and scores the audit. In order to enter into these program, participants must have completed the API Q2 Essentials or Professional and must have audit experience. If they have not obtained their auditor credentials, then they will also have to complete the API Q2 Auditor Fundamentals prior to entry. This program has been taken by most of the international, national and stated owned operators, and services providers. Upon completion, participant receive their Registered Professional Number (RPN™), leather bound credentials and 2.5 accredited CEUs. This program meets all competency requirements due to the accreditation, skills and competency assessment and examination. For more information click here.

Product Specification Auditor Endorsement – 2 Days, 2.0 CEUs
(Course Code: WG-002-3.6)

These series of courses covers all of the API Product Specifications. Auditors select the specification and enter the 2 days technical auditor program, where they learn the specification and must demonstrate how to audit the specification effectively. During the audit, the auditors undergo both formative and summative assessments (competency) and upon completion receive their API product specification endorsement on their auditor license. This program has a prerequisite which requires participants to have completed either the API Q1 Fundamentals for Auditors or the API Q1 Technical Application for Lead Auditor prior to adding product specification endorsements.

ISO Standards Auditor Endorsement – 2 Days, 2.0 CEUs
(Course Code: WG-002-3.7)

These series of courses covers the ISO 9001, ISO 14001, OHSAS 18001 and the ISO 45001 Standards. Auditors select the standard to which they seek endorsement and enter the 2 days technical auditor program, where they learn the standard from an auditor perspective and must demonstrate how to audit the standard effectively. During the audit, the auditors undergo both formative and summative assessments (competency) and upon completion receive their ISO standard endorsement on their auditor license. This program has a prerequisite which requires participants to have completed the Auditor Fundamentals course prior to adding ISO standard endorsements.

Master Auditor (Petroleum & Natural Gas) – 5 Days, 5.0 CEUs
(Course Code: WG-002-3.8)

This program has been designed for seasoned and experienced lead auditors. This program has been designed to ensure the auditor has an in-depth understanding and knowledge of the API Q1 and Q2 specifications and demonstrates competency for performing an audit in the petroleum & natural gas industry. This program is built around practical applications, summative and formative assessment which ensures knowledge transfer and competence. The following prerequisites must be satisfied prior to entry into this program: 1) completion of an API Q1 and Q2 Specification Course, and 2) completion of either an API Q1 or Q2 Auditor Fundamentals and Technical Application for Lead Auditor Course. Upon completion, the participants receive their Registered Professional Number (RPN™), leather bound credentials with the designation of Master Auditor (petroleum & natural gas) and accredited CEUs.

16

ISO 9001 Technical Application for Lead Auditors – 3 Days, 2.5 CEUs
(Course Code: WG-003-1.4)

This is the most advanced auditing course and teaches skilled and qualified auditors how to audit the specification. This includes auditing a full management system with a skilled audit team made up of lead auditors and industry SMEs. Upon completion, the audit committee reviews and scores the audit. In order to enter into these program, participants must have completed the ISO 9001 Fundamentals or Practitioner and must have audit experience. Upon completion, participant receive their Registered Professional Number (RPN™), leather bound credentials and 2.5 accredited CEUs. This program meets all competency requirements due to the accreditation, skills and competency assessment and examination.

ISO 9001 Generalist – 1 Day, 0.8 CEU
(Course Code: WG-003-1.1)

This course was designed to provide an organization an awareness of the standard. It also meets the requirements for training for support functions, such as procurement, contracts, sales, engineering, demand management, finance, human resources, operations, field coordinators, supervisors, and managers. Upon completion, participants receive 0.8 accredited CEUs and a certificate of completion. This program meets competency requirements due to the accredited CEUs and knowledge assessment conducted during the course. For more information click here.

ISO 9001 Fundamentals – 3 Days, 3.0 CEUs
(Course Code: WG-003-1.2)

This course covers the entire standard and includes practical applications, skills assessments, and knowledge checks. Upon completion, the participants receive their Registered Professional Number (RPN™), leather bound credentials and 3.0 accredited CEUs. This program meets competency requirements due to the accredited CEUs, practical applications, skills assessment, and examination. This program is designed for anyone who has a responsibility to deploy, implement or maintain their management systems, to include support functions and operations.
For more information click here.

ISO 9001 Practitioner – 4 Days, 3.2 CEUs
(Course Code: WG-003-1.3)

This course is our most coveted ISO 9001 course as participants earn the designation of a Certified Practitioner. The program is fully accredited and meets competency requirements. Upon completion, participants receive their Registered Professional Number (RPN™), leather bound credentials, ISO 9001 Practitioner designation, license and 3.2 accredited CEUs. This program is designed for quality and HSE personnel, auditors, managers responsible to oversee their management systems.
For more information click here.

ISO 9001 Technical Application for Lead Auditors – 3 Days, 2.5 CEUs
(Course Code: WG-003-1.4)

This is the most advanced auditing course and teaches skilled and qualified auditors how to audit the specification. This includes auditing a full management system with a skilled audit team made up of lead auditors and industry SMEs. Upon completion, the audit committee reviews and scores the audit. In order to enter into these program, participants must have completed the ISO 9001 Fundamentals or Practitioner and must have audit experience. Upon completion, participant receive their Registered Professional Number (RPN™), leather bound credentials and 2.5 accredited CEUs. This program meets all competency requirements due to the accreditation, skills and competency assessment and examination.

Lean Six Sigma Yellow Belt – 3 Days, 2.4 CEUs
(Course Code: WG-002-4.1)

This (Yellow Belt) is the introductory level for Six Sigma and no prior knowledge is required. The participant will learn terminology and understand the basics of Lean Six Sigma and apply basic methodology and quantifiable tools to an improvement project. This course highlights the benefits of Lean Six Sigma in the oil & gas industry, focuses on critical examples and unique industry problems. This 24 hours course helps develop skills and strategies for successful Lean Six Sigma implementation. Upon completion, participants receive their Registered Professional Number (RPN™), leather bound credentials and 2.4 accredited CEUs. For more information click here.

EDUCATIONAL TRAINING SERIES

Train-the-Trainer – 5 Days, 2.4 CEUs
(Course Code: WG-001-1.1)

The Train-the-Trainer course was designed to qualify individuals to effectively design and lead accredited training courses and programs. The objective of the training is to provide participants with sufficient understanding, knowledge, and skills needed to successful deploy, and execute highly effective training programs in which they are providing instruction. The program utilizes the latest teaching methodologies, practices, and techniques as well as practical application in this course to ensure both prospective and approved providers leave with the required knowledge and practical application skills to ensure they are utilizing effective training techniques, meeting the ANSI/IACET 1-2013 Standard for Continuing Education and Training. Upon completion, participants receive their Registered Professional Number (RPN™), leather bound credentials and 2.4 accredited CEUs. For more information click here.

Wollam Groups offers the above trainings in North America, Middle East, Caspian Region and South America. Contact us at info@wollamgroups.com or visit www.wollamgroups.com for more information such as eligibility for group discount, corporate discount, private classes and training dates..
