Health Guarantee

Diamond J British Labs, LLC will not knowingly sell a sick puppy. We have all of our puppies checked by our veterinarian prior to them going to their new homes. We ask that new owners visit their personal veterinarian within five days of purchasing their puppy to assure that the puppy is well and free from any serious health problems. If your puppy is found to have a serious health problem within the five days after purchase, bring the puppy back to us along with a written statement from your veterinarian. You will be given a complete refund of the purchase price of your puppy. Injury or accidents after the purchase of the puppy would not be categorized as refundable under our guarantee.

Purchaser Acknowledgements:

Owning a puppy means frequent visits to a licensed veterinarian. The Purchaser understands that he/she will be responsible for all costs associated with all veterinarian visits, such as but not limited to any veterinarian costs associated with spaying or neutering, including undescended testes. Failure of the Purchaser to provide puppy with timely inoculations or regular veterinary care will void this health guarantee. Purchasers should follow a recommended nutritional program, including feeding only premium dog foods and vitamin supplements. No replacement nor credit will be given for hip dysplasia if the dog is overweight or over exercised. Your puppy should not be over exercised during their growth period. Temperament issues are not covered under this health guarantee, they can be caused by a number of factors outside the control of the Seller. These behaviors include but are not limited to, lack of training, discipline or proper socialization.

Diamond J British Labs, LLC, and our ethical decision to *NOT* remove dew claws!

We have, with research on the cultural practice of removing dew claws on puppies, purposefully decided to not partake in this practice. The dew claw *does* have a function, to prevent torque on the leg with turning and for aiding when getting up or out of difficult terrain. The dew claw is attached to the foot with tendons, these tendons are attached to muscles. By removal of the dew claw the tendons will atrophy from lack of use. The atrophy of these tendons and muscles lead to potential carpal arthritis and perhaps further joint issues to the elbow, shoulder and toes.

Injury related to dogs with the dew claw left intact is rare! We believe that the risk of long term leg and joint problems secondary to dew claw removal has far greater probability than the uncommon risk of injury.

Diamond J does not support dew claw removal. This guarantee is null and void if the dew claws are removed, by choice of the Buyer, after purchase.

Diamond J British Labs, LLC guarantees that the puppy is free from ocular/vision defects and or severe genetic hip dysplasia, a conditional guarantee to the original purchaser.

In conscious effort to uphold the highest of standards in our breeding program, Diamond J British Labs, LLC will not breed dogs with high hip scores nor to blood lines that have a proven predisposition to hip dysplasia. Hip dysplasia can be genetic or as the result of overwork, injury and /or obesity. Our guarantee is to protect the Purchaser from [genetic hip dysplasia](#). We ask that at 24 months of age your dog is x-rayed, OFA certified, and examined by your veterinarian. (We prefer, if at all possible, that the x-rays are obtained without sedation. This is safer for your dog and gives a more accurate reading of their hips.) If severe genetic hip dysplasia is diagnosed, we require any and all veterinarian examination statements of findings, x-ray films and photos of the dog be provided to us. This information and data is then used for confirmation by our veterinarian.

We require that a dog with a positive confirmation of severe genetic hip dysplasia is spayed/neutered or euthanized, all dependent on the severity. [In order to honor the guarantee, written confirmation from your veterinarian of the action taken must be provided to us.](#) If your dog has to be euthanized because of severe [genetic](#) hip dysplasia, you will need to return your dog to us to be euthanized. We will replace your dog at no charge after the euthanization fee for the affected dog has been paid. If you choose to keep your dog with severe [genetic](#) hip dysplasia, we will provide you with your next puppy at half of the current asking price. *This guarantee for hip dysplasia is null and void if the dog has been bred or used as a stud, or is the result of overwork, injury and or obesity.*

A dog diagnosed at 2 years of age of ocular or vision defects will be kept by the Purchaser but proof of the diagnosis shall be presented to the Seller and will be confirmed by our veterinarian. With confirmed positive results, the Purchaser will receive their next puppy at half of the current asking price.

If the Purchaser declines any replacement puppy, then the Seller shall be under no further obligation and it shall be deemed that the Purchaser has released the Seller from any and all further claims and waived any rights to pursue any claims against the Seller. The Health Guarantee shall terminate and become null and void if the Purchaser fails to comply with any term in this Agreement regarding care, maintenance, or medical treatments or procedures that the Purchaser is responsible for providing the puppy.

The value of the puppy for purposes of this Health Guarantee is limited to the Purchase Price of the puppy, and does not include taxes, shipping, health certificate and veterinarian costs, shipping crate or any additional casts or expenses incurred or asserted by the Purchaser. This Health Guarantee is non-transferable and is not valid for sales of puppies delivered outside of the United States and Canada.

Spaying or neutering your pet

By spaying and neutering your pet, you'll help control the pet homeless population. Millions of healthy dogs are euthanized in the United States each year due to a lack homes. Along with aiding in controlling the pet population there are medical and behavioral benefits to spaying or neutering your puppy. Our puppies are sold with limited registration therefore you are expected to spay or neuter your dog at an appropriate age as directed by your veterinarian.

Limited Registration

All litters are registered as Limited Registration. Full Registration will be granted only to a select few. Provisional criteria, an additional fee and a contract is required for Full Registration. Arrangements for changing the registration status must be prior to any breeding. We will not give Full Registration for any litter conceived or born prior to the completion of the requirements set forth in our contract. Please inquire for further details.

There are literally hundreds of diseases and sicknesses that can be acquired by an animal during its lifetime, just as in humans. We cannot guarantee that none of them will affect your dog. Please do not expect that Diamond J British Labs, LLC will assume this responsibility. You can be proactive in warding off many of these illnesses with vaccinating your dog along with providing them with good nutrition, exercise, and a healthy living environment. It is strongly recommended that you establish a good relationship with your local veterinarian and have your dog examined on a regular basis. Health and wellness is often obtainable with prevention and maintenance!

All of our puppies will be registered with AKC and with the DJ designation to identify Diamond J British Labs, LLC. If the puppy is not registered with AKC and/or this designation of DJ is dropped from the registration, this guarantee will become null and void. The original copy of the Puppy Guarantee, (this form), must be presented at the time of any request toward the Health Guarantee. Without the original this guarantee is null and void.
