

Tina

Residential DSP
4 years

Tina was based within the MYEP Adult Day Program. When the Adult Day Program shut-down in March 2020 due to Covid 19, Day Program employees who wished to continue working were relocated to our residential program. Tina was one of these employees. During the past year and a half, Tina has showed her ability to work with a wide range of people, excelling in providing services to all those she works with. Tina is based in a home where the support needs are high due to the mental health needs of the people living there. Tina remains calm and supportive while assisting those she works with when they are experiencing challenges associated with their mental health needs; she is calm, supportive, and reassuring. Tina also assists the Lead DSP of the home with any task that needs to be completed, is extremely reliable and does a great job in communicating each individual's needs to supervisory staff.

Tina also goes above and beyond for the entire agency. Not only does she provide supports at her primary location, but she also consistently helps within 3 other residential homes, which has been a tremendous help during the staffing shortages.
