2018 Summer Camp

Program Schedule

Open Hours:
8:30am-6:00pm
Monday-Friday

www.USArtsEducationCenter.com

Program Name	Description
Academics	Students will be challenged with academic work on Math, Reading Comprehension, Social Studies, Science, Analogy and Logic Thinking based on their grade and individual level. Math works will include math drills and also focus more on word problems. They will review what they've learned in the past school year and learn something new to help kick off the coming school year.
Art	Art classes include drawing, sketching, painting with different medium by professional art instructors. Students will develop their creativity and drawing/painting skills through carefully designed lessons.
Crafts	Students will learn to make crafts with different materials. It will be hands-on fun activities to build creativity and imagination of kids.
LEGO® Mine, Craft, Build Adventure Game	Bring Minecraft to life using LEGO® materials! Resourcefulness, creativity, and cooperation come together in this unique building adventure game; roll the dice to mine for resources, craft tools, and watch out for Creepers! This ultimate Play-Well Minecraft experience using LEGO® materials is an original game designed by Play-Well instructors, using gameplay elements and characters inspired by the popular Minecraft video game. Students will have a blast, even without any prior experience with Minecraft or LEGO® materials.
STEM Challenge using LEGO® Materials	Gear up your engineering skills with Play-Well TEKnologies and tens of thousands of LEGO® parts! Apply real-world concepts in physics, engineering, and architecture through engineer-designed projects such as: Forklifts, Houseboats, Mini Golf Courses, and the London Tower Bridge Design and build as never before, and explore your craziest ideas in a supportive environment. There are no prerequisites for this course.
Public Speaking	Students will explore the vast seen and unseen world on a given subject. We will incorporate learning through listening, watching, researching, & writing. Students will employ their oral reading skills, creative expression, and dramatic voice to communicate the meaning of each script. Each student will be prepared to present their accomplishments on the final day of our 2-week session. A fun and memorable learning experience is the forecast for this class.
Story Telling	Students will learn the basics of public speaking and practice on telling their stories. They will participate in Reading Theater and perform to the parents at the end of the 2 week session.
Sculpture	Students participating in the Sculpture program will have the opportunity to creatively express themselves through the exploration of three-dimensional art media! One of the projects that students will work on includes a self-portrait made from different types of metal wire, metal foil, wood blocks, and a variety of other materials. Through the creation of this three-dimensional self-portrait, students represent an interest or activity that they are truly passionate about. Upon completion, students proudly display the work in the art show at US Arts.
