Trucking Fuel Efficiency Alternatives Survey

Welcome to Our Survey

Thank you for participating in our survey. Your feedback is important.

Fuel is the second largest expense item after wages and benefits for most trucking operations. What can operators do to improve fuel efficiency?

The good news is a number of options are available to trucking operators and there are many data points to validate their fuel efficiency improvement claims.

This survey is designed to gather additional feedback to assist:

1. Those who already use the technologies but want to justify their continued use to management,
2. Those who need additional data to secure the funding/capital to make the investment(s), and
3. Those who are just beginning the journey of investigating the alternatives available and where they should invest

By answering the questions, you will receive a copy of the survey findings to help you with your journey.

All answers are kept in strict confidence. No company specific data will be shared, only aggregated data.

Thank you, in advance, for your participation.
