

## PRIVACY POLICY

March 2014

---

### What it covers

This policy covers the treatment of personally identifiable information that Aviation Logic Limited collects when you are in the AviationLOGIC.com domain. Links within this domain to other web sites are not covered by this policy.

### Information collection

You can visit our site without telling us who you are or giving us any personally identifiable information. The Company does not use cookies for the general running of the site. Cookies may be used on some 'interactive' pages to provide additional functionality or when it is totally necessary to maintain a unique 'ID' on your browser whilst you use those pages. Where cookies are used their purpose will be made clear. It is only when you complete a form that requests personal information or email Aviation Logic Limited that you can be identified. When completing forms you may be asked for a variety of personal information such as name, address, post code etc. Aviation Logic Limited automatically receives and records information on server logs from your browser. The Company only monitors the IP addresses of visitors to assess which pages are the most popular. These IP addresses are not linked to any personal data so all visitors to our site remain anonymous.

### Information use

Where you voluntarily choose to give us your personal details the personal data you give Aviation Logic Limited will be used exclusively for providing you with the information or service you have requested.

### Information Sharing and Disclosure

Aviation Logic Limited will not sell or rent your personally identifiable information to anyone. Aviation Logic Limited will only send personally identifiable information about you to other organisations when we have your consent. This is only necessary when we need to share your information in order to provide the information or service requested. We also use the information in response to subpoenas, court orders or other legal process.

### Security

While we strive to keep the information that you supply secure, please be aware that the Internet is not a fully secure medium. Policy changes by using our site you agree to accept this privacy policy and are aware that our policy may change with time. Any changes to this policy will appear on this web page.

## SUMMARY OF TERMS

### Browser

Used to locate and display Web pages via a software application. The most popular ones are Netscape Navigator and Microsoft Internet Explorer.

### Cookie

Message given to a web browser by a web server. The message is then stored by the browser in a text file called cookie.txt. Each time the browser requests a page from the server, this message is sent back. A cookie's main objective is to identify users and personalise their visit by customising web pages for them for example by welcoming them by name next time they visit the same site. A site using cookies will usually invite you to provide personal information such as your name, e-mail address and interests.

### IP (Internet Protocol)

All networks connected to the internet communicate using the IP protocol, the technical standard which allows data to be transmitted between two devices. TCP/IP (Transmission Control Protocol/Internet Protocol) is responsible for making sure messages get from one host to another and that the messages are understood.

### IP address

If you are connected to the Internet you have one, for example it may look something like this 198.184.98.9

### Secure server

This allows information to be sent 'securely' by encrypting the information you send. HTTPS (Hypertext Transfer Protocol over Secure Socket Layer, or HTTP over SSL) is a facility built into a browser that encrypts and decrypts user page requests as well as the pages that are returned by the Web server.

### Web server

Delivers (serves up) web pages to your computer.
