

ben pearson 76

A Great Line!

ben pearson

From our revolutionary new Model 250, 210 and 200 Compounds to the smallest accessory item, Ben Pearson fields the most versatile lineup of precision-engineered archery equipment in the industry. There's everything you need to kick-off a super sales season for '76.

Great Linebackers!

Ben Pearson TV. Hard Hitting Commercials Playing In The National Spotlight.

Thirty-second TV spots showcased in Zebco's award winning outdoor series, "The Fisherman". In more than 100 markets coast to coast. Twenty-five-second dealer versions available for your local use, on request.

Ben Pearson Print. Strategically Placed For Greatest Impact.

Full color, full page ads in every issue of Bow & Arrow, Bowhunter and Archery World. Plus regional and local publications.

Pearson Packaging. It Bowls 'Em Over.

The fastest draw in your store. Easy to display, easy to stock, easy to inventory... and irresistible to your customers. It's the sales help you don't have to pay.

Ben Pearson Hotline. Call Our Number And We'll Get The Job Done For You.

Day or night, seven days a week, just dial 800-331-4660 toll-free to order any Pearson product, promotional or merchandising aids. In most cases, we'll have your order ready to ship within 24 hours.

Pearson Model 250 Compound

Faster. Quieter. Uncomplicated.

The Ben Pearson Model 250 Compound is a remarkably efficient, one piece, compound bow that retains all the beauty and feel of a traditional bow, while providing extraordinary speed, great stability and quietness.

It delivers more foot/pounds of energy, and thus, more speed, than any of what are considered to be the 4 major compounds on the market today. At 226 feet per second, no other compound tasted could equal its velocity. The Model 250 tops them all — by as much as 23 feet per second.

One key reason is its "Hyper-Flex" limbs. This super stable

limb incorporates many of the same principles of energy build up, storage and release found in the "Hyper-Kinetic" action of Ben Pearson's best traditionally styled hunting and tournament bows.

The Model 250's Turnbuckle Tuning is simple and uncomplicated, requiring no special tools, no special knowledge of physics or mechanics. It's factory tuned and tested before it reaches your hands. And you keep it in tune with a simple turnbuckle adjustment.

In the new Ben Pearson Model 250 Compound you get speed, quietness, simple Turnbuckle Tuning and true, handcrafted beauty. What else is there?

No. 250 Ben Pearson Compound

Length: 50" (Measured axle to axle).

Peak weight: 45, 50, 55 and 60 lbs.

Draw lengths: 28-29-30-31".

String (brace) height: 8-1/2".

String length: 40".

Sight window: 5/16"

past center. Length: 5-1/2".

Cable length: 58-1/2"

each of 2 cables.

Cable diameter: 1/16", 3/32"

O.D.

Cam size: 2" and 2-1/4".

Arrow rest: Hoyt Pro-Flex.

Limbs: Exclusive "Hyper-Flex" working limbs. Gordon fiberglass.

Handle: Hand finished Pearson

Marblewood. Tapped for stabilizer.

Bow weight: 4 lbs. 2 oz.

Shipping weight: 5 lbs.

Specify draw length, peak weight and right or left hand.

Licensed under Allen Patent No. 3,486,495.

Pearson Models 210 and 200 Compounds

Economical New High-Performance, Uncomplex Compounds

Ben Pearson's new Model 210 and 200 Compounds are possessed with all the advantages of compound design, plus the super-salable attributes of beauty, simplicity, versatility and economy.

Both the 210 and the 200 are handcrafted from tough, lustrous Pearson Marblewood to provide maximum one piece stability and a traditional look and feel. Non-slotted "Hyper-Flex" laminated limbs are stronger and faster than comparative models.

Both bows keep their

balance — without tuning or tinkering. Since cables are anchored at the limb tips, the drawing pressure is always equalized. Even "string walking" will not affect efficiency or tune.

The Model 210 offers an adjustable peak weight range of 15 pounds (from 45 to 60 with a single screw adjustment). And both are quieter than conventional compounds, with fewer moving parts.

At full draw, these models feature a weight relaxation of over 40 percent. And their lighter physical weight (under 4 lbs.) lets you hunt hard or hold the draw without undue arm fatigue.

Whether it's the Model 210 with adjustable peak weight, or the Model 200 in a fixed weight of 45, 50, 55 or 60 pounds, archers will quickly recognize and respond to the obvious "better buy" qualities of these economical new Pearson Compounds.

Pearson Model 210 Adjustable Weight Compound

Bow length: 46" (Measured axle to axle).

Peak weight: Adjustable to 45, 50, 55 or 60 lbs.

Pre-set @ 45 lbs.

Draw lengths: 27"-29" and 29"-31".

String (brace) height: 9-3/4".

String length: 38".

Sight window: 3/16" past center. Length: 6-1/2".

Cam size: 2" and 2-3/8".

Arrow rest: Hoyt Pro-Flex.

Limbs: Exclusive "Hyper-Flex" working limbs. Pearsonite fiberglass.

Handle: Hand finished Pearson Marblewood.

Hardware: Aluminum.

Cam material: Nitabron G.

Bow weight: 3 lbs. 15 oz.

Shipping weight: 4-1/2 lbs.

Specify draw length and right or left hand.

Pearson Model 200 Fixed Weight Compound

Bow length: 46" (Measured axle to axle).

Peak weight: Fixed. Choice of 45, 50, 55, or 60 lbs.

Draw lengths: 27"-29" and 29"-31".

String (brace) height: 9-3/4".

String length: 38".

Sight window: 3/16" past center. Length: 6-1/2".

Cam size: 2" and 2-3/8".

Arrow rest: Hoyt Pro-Flex.

Limbs: Exclusive "Hyper-Flex" working limbs. Pearsonite fiberglass.

Handle: Hand finished Pearson Marblewood.

Hardware: Aluminum.

Cam material: Nitabron G.

Bow weight: 3 lbs. 15 oz.

Shipping weight: 4-1/2 lbs.

Specify draw length, peak weight and right or left hand.

Hyper-Kinetic Limb Hypos Speed & Sales

How The "Hyper-Kinetic" Limb Design Benefits The Archer.

- Generates a uniform power build-up during the draw, without stacking or finger pinch.
- Provides faster acceleration on release, plus an increased overall arrow velocity from release to target.
- Provides a flatter arrow trajectory for improved accuracy.
- Gives the bow greater stability.
- Virtually eliminates string slap.

Arrows cast from this hyper-powered limb will fly farther, faster, than those cast from less efficiently designed bows of the same given draw weight. Its super silent release is a decisive advantage to the bowhunter, as well as an invaluable aid to the concentration of the tournament shooter.

"Hyper-Kinetic" Action— The power behind a great Pearson line

George Birnie's "Hyper-Kinetic" limb design is a super-efficient, three stage system of energy build-up, storage and release, producing maximum uniform rectilinear velocity.

This revolutionary design commands the maximum utilization of deflex, reflex and recurve. These are the three sections which make up the total working limb. In the Ben Pearson bows, they are exactly synchronized in flex and recovery timing.

During the draw, each working section acts upon the others to create a maximum build-up of energy represented by tension. Beginning in the deflex section, energy is generated and stored in the bow limb until that section reaches the optimum energy producing capability of its design limit. At this point, the kinetic action originated in the deflex triggers the energy producing properties of the reflex, where the process of power build-up and storage is repeated until the creative potential of that section has been fulfilled, the kinetic action then triggering the power production input of the recurve.

Every bow is separately designed and engineered so that the critical point of total maximum energy build-up is reached at the bow's minimum draw length, and retained until the bow reaches its draw limit. The wider limbs, with micro-tapered cores, are duo-stressed, and provide for a stable housing of the harnessed energy until it is released by the archer.

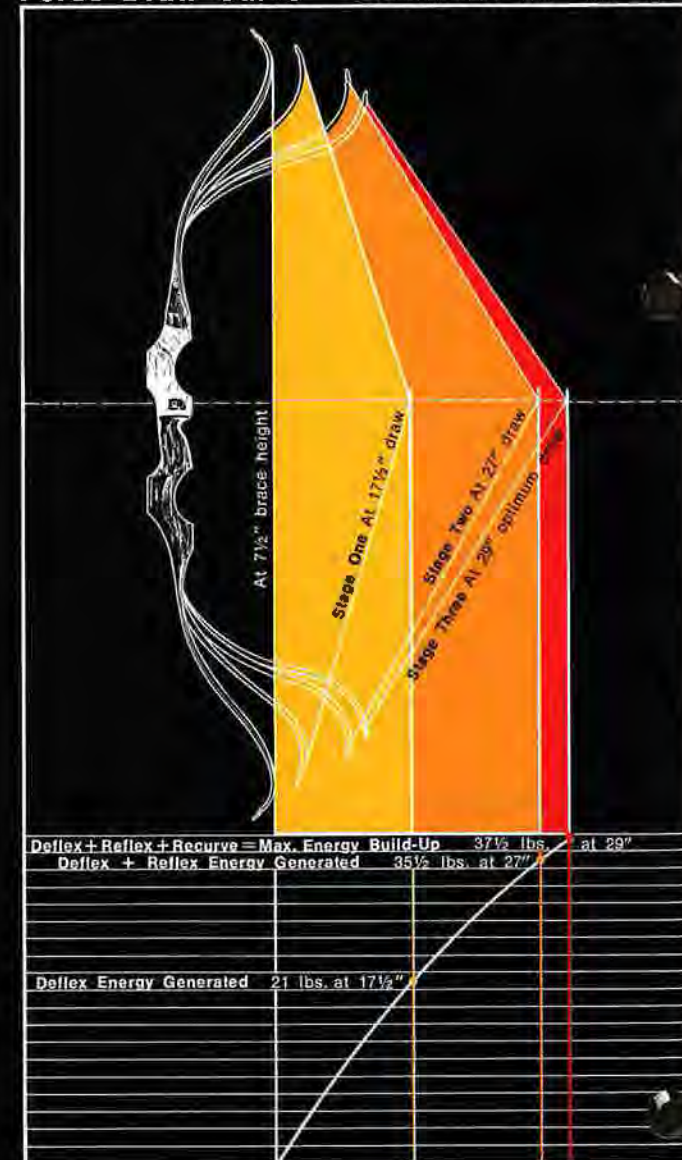

At that instant, all of the previously stockpiled energy is loosed against the resisting mass represented by the arrow. In the reverse order of their build-up, the recurve, reflex and deflex kinetically inter-react to produce an unbelievably smooth, three-stage, synchronized release of explosive power. Each section's energy input is triggered at the exact instant of its maximum contribution to limb efficiency. This eliminates the "power pauses" or energy leaks common to bows of less efficient limb design in

which the working sections contribute in an improperly timed sequence, causing the arrow to be jerked or "hammered" forward into the cast, and creating a violent bow kick that threatens the stability of the archer's bow arm — a serious deterrent to the achievement of either velocity or accuracy.

The synchro-timed release of the "Hyper-Kinetic" limbs assures a constant, uniform power thrust, resulting in maximum rectilinear acceleration and velocity. The bow string "stays with" the arrow, propelling it forward in a flat, accurate cast. String acceleration continues to a point slightly beyond brace height, where the deflex section of the bow provides both a decelerating action and shock absorbing function, eliminating noisy string slap.

"Hyper-Kinetic" Action is the power behind super speed, super silence, super smoothness. You'll feel it in each Ben Pearson bow.

Force Draw Curve — Centurion 69" at 29"

silencer td®

The totally new take-down designed to take trophies in stride

There's more to owning a Pearson Silencer® than the thrill of taking the trophy. The first reward is purely aesthetic — the sheer beauty of its classical lines and black, Marbled wood handle section. The confirming of expectation begins at the moment of first draw, with the feel of unrestricted smoothness, and continues through the sudden explosion of energy on release. All the promise of the Silencer's® innovative "Hyper-Kinetic" limb design is fulfilled in its awesome speed, flat-cast accuracy and incomparable silence. Ben Pearson's patented "Rigid Lock"® takedown further sweetens the experience, with trouble-free performance and easy-carry convenience.

A. For take-down carrying convenience, the handsome, double padded vinyl carrying case provides both protection and handling ease.

B. Precision-fitted aluminum alloy knuckles quickly lock together with a tapered pin to provide rigid stability.

No. 7158-0 Silencer td®

Length: 58" A.M.O.
 Draw weights at 28": 40 to 55 lbs.
 Draw limit: Unlimited.
 String (brace) height: 7 1/2" to 8 1/8".
 Handle: Hand finished Marbled wood with red laminates. Pistol grip.
 Rigid Lock® aluminum alloy knuckles. Tapped for stabilizer.
 Arrow rest: Mohair quiet carpet.
 Sight window: Center shot.
 Length: 5 1/2".
 Limbs: "Hyper-Kinetic" full working recurve. Black Pearsonite fiberglass with reinforced tips.
 Carrying case: Black vinyl with heavy-duty zipper and soft, protective lining. Inside pocket for string and accessories.
 String: Serv-Weid custom Dacron®, pre-stretched and pre-waxed.
 Shipping weight: 6 lbs. 10 oz.
 Specify draw weight and right or left hand.
 Note: The Silencer® is also available in 60 and 65 lb. weights. Allow additional time for delivery of bows over 55 lbs.

renegade™

➤ All the hustle and muscle
you need to bag the big ones

The forward flowing handle section and "Hyper-Kinetic" limb design give this new 60" bow a distinctively aggressive look. Ready to take on anything you're man enough to go after. The Renegade™ answers every demand for great striking power and consistent, torque-free shooting. Carefully hand crafted, the black Marblewood riser flows into long, clean micro-tapered limbs, whose deflex reflex and recurve provide silent acceleration. Like each of Ben Pearson's six new hunting bows, the Renegade™ is available in either right or left hand models.

No. 7260-0 Renegade™

left hand.

rogue®

➤ Buck-quick and cat-quiet,
this rascal's ready to hunt

Speed and silence are the keys to successful hunting. Draw on the Rogue® for both. Nock your favorite broadhead. Anchor, and release. "Hyper-Kinetic" Action triggers a uniform thrust of three-stage penetrating power, and the broadhead silently sizzles to its target in a flat, unwavering trajectory. This 58" performer does all the things you expect of a reliable hunting bow. It casts heavy hunting arrows with tremendous speed and consistent accuracy, answering the most defiant challenges of the game and the terrain.

left hand.

spoiler[®]

 Sweet, smooth and sassy

The ruggedly handsome appearance of this new 52" bow tells you it definitely belongs to the famed Pearson "hunting clan". Like each of the bows in the Ben Pearson line, the Spoiler[®] sports an unmistakable family resemblance, starting with the tough, Marblewood handle. Its duo-stressed limbs are designed for extra lateral stability. "Hyper-Kinetic" action provides the power to drive a broadhead the maximum distance in the shortest period of time. The Spoiler's[®] popular 52" length makes for easy handling under the most challenging hunting conditions. It's the bow that's spoiling for the toughest tests you can raise. Our pro staff rates it, "as game as they come".

left hand.*

equalizer[™]

**The odds on favorite
in any close situation**

A beauty in the bush. Master-bowyer George Birnie took the principles of the reflexed tension and compression required to achieve the great acceleration of a tournament bow, and compacted them into 48 inches of hunting dynamite. He added to this explosive penetrating power the advantages of Pearsons' positive-control grip, and wider, laterally stabilized "Hyper-Kinetic" limbs. The result is a bow of great maneuverability, with a flat, accurate cast that puts heavy hunting arrows right on the money. Regardless of the game, you've got the Equalizer[™] — the archer's best bet for heavy brush and tree stand hunting.

No. 7148-0 Equalizer[™]

Length: 48" A.M.O.
Draw weights at 28":
40 to 55 lbs.

Draw limit: 31"

recurve. Black Pearsonite fiber-
glass with reinforced tips.

String: Serv-Weld custom Dacron[®],
pre-stretched and pre-waxed.

Shipping weight: 3 lbs.

Specify draw weight and right or left hand.

centurion®

 A superb bow for the serious tournament archer

In just two short years, the Pearson Centurion® has gained an international reputation as one of the finest bows ever introduced to the world of tournament archery. A deflex, reflex, recurve bow, the notable visible feature of its "Hyper-Kinetic" limb design is the near flat reflex section, which functions as a coordinator between working limb and working recurve. Their precise synchronization eliminates the "sensitivity" common to bows with high efficiency ratings.

This "Hyper-Kinetic" action also contributes to the arrow's extremely high speed and the resulting flat trajectory. At the moment the arrow leaves the Centurion®, the tight recurve, working in synchronization with the flat reflex section, tightens the bow string with equal and simultaneous action from each nock. This action virtually eliminates vibration and jar, and also affords silent performance.

The handle riser section is hand sculptured from laminated Marblewood and Shedua. The sight window in the Centurion®, by an exclusive Pearson design, has been moved a full 3/8" past center. The arrow is thus positioned in the absolute center of the bow, for a perfectly true alignment. The Centurion® is tapped for a stabilizer and is equipped with the finest, adjustable "panic button." It can be tuned to total perfection.

No. 7169-0 Centurion®

Length: 69" A.M.O.
Draw weights at 28": 30 to 45 lbs.
Draw limit: Unlimited.
String (brace) height: 7-1/2" to 8-1/2".

the pearson switchblade® & switch-on™ system

A superlative new broadhead and the only arrow-saving interchangeable point system that lets you . . .

- switch from 4-blade to 2-blade broadhead
- switch from broadhead . . . to blunt . . . to field point
- switch from aluminum . . . to fiberglass . . . to wooden shafts
- switch broadhead colors to co-ordinate with arrow shafts, crests and fletchings, improve vertical alignment.

The Pearson Switchblade® — Performance +

This precision engineered 4-blade broadhead meets every performance standard of a truly outstanding hunting head. Aerodynamically superior, it shoots with the ballistic efficiency of a target arrow. It is silent and stable in flight, compression-resistant on impact, and provides maximum cutting action.

The Switchblade's® advanced design maximizes exposure of all four cutting blades, primary and auxiliary. **The auxiliary blades alone provide 30% more cutting surface than those of the previously most popular broadhead on the market.**

The primary blade is spring tempered carbon steel. It can be honed to acute sharpness, holds a keen edge, and can be easily resharpened in the field. The primary blade is welded to a steel ferrule whose design provides solid strength and allows unrestricted penetration. **The ferrule is positioned behind the cutting blades and cannot interfere with penetration. A further improvement is the positive locking of the auxiliary blades to the ferrule, prohibiting loosening or "pop out" on impact.**

Color co-ordinated Switchblades® improve your vertical alignment

New Ben Pearson Switchblades® are the only broadheads designed to co-ordinate with the colors of your arrow crests, shafts and fletchings. In addition, they provide a definite aid for the achieving of truer visual vertical alignment in those situations where bare bow techniques are employed and the broadhead is used as a sighting reference. Four colors: white, bronze, green and yellow.

The Pearson Switch-On™ System lets you save on shafts by switching points

The economical Pearson Switch-On™ System lets you reduce the number of needed shafts by allowing you to switch from broadhead to blunt to field point on the same arrow, anytime you wish. It's so easy you can switch them in the field. The system also includes the few inexpensive components for adapting from aluminum to fiberglass to cedar shafts, and is perfectly compatible with

Switchblade® Specifications
Length: 2½"
Width: 1¼"
Auxiliary Blade Width: 1-1/16"
Auxiliary Blade Angle: 50°
Ferrule: Behind blades. Does not interfere with penetration.
Steel: 1075 Spring hardened.
Weight: 130 grains.

other convertible point systems. No special tools or equipment are required. To switch head or shaft types, just screw on the point required for the type of shooting you want to do.

Pearson Switch-On™ components include:

1. A Switch-On™ Wooden Shaft Converter for converting wooden arrows to the Pearson Switch-On™ system. Consists of a durable, lightweight, 5° tapered aluminum sleeve which slips over and glues to the arrow shaft. The converter accepts all Switch-On™ points (Switchblade® broadhead, blunt and field) as well as other convertible points of your choice.
2. A Switch-On™ Broadhead Adapter to fit Switchblades® or other broadheads to wooden (with converter), aluminum and fiberglass (with insert) shafts. Available installed in Switchblade® as a single unit, or may be ordered separately. High strength aluminum.
3. A Switch-On™ Insert for aluminum and fiberglass arrows, threaded to accept any convertible point. Of lightweight, high strength aluminum. Available in specific shaft sizes.
4. A Switch-On™ Blunt Point matched to Switchblade® weight.
5. A Switch-On™ Field Point matched to Switchblade® weight.

(To order Switch-On™ Components, see Points page 28.)

pearson hunting arrows

Ben Pearson hunting arrows are manufactured to AMO approved equipment and measuring standards.

A-Mercury XX-80 Pearson-Easton Aluminum

Developed especially for the many trophy hunters who demand the finest precision arrow money can buy. Unequalled uniformity of weight and spine. armguards, tabs & gloves

For men, women and young archers

No. 8675-0 Full Length Armguard

Quality split leather, with soft suede lining and four adjustable arm straps. Protects the entire forearm and holds shirt out of way.

No. 8665-0 Vented Armguard With Velcro® Fastener

Long-lasting black leather, with soft suede lining. Fastens securely at the touch. Vented for hot weather comfort. Three spring steel stays. Adjustable straps.

No. 8660-0 Hunting Armguard

Heavy-duty with adjustable arm straps. Concealed fiber stay. Black vinyl, lined with soft suede.

No. 8690-0 Skeleton Armguard

The ideal, all-purpose armguard. Provides maximum protection. Strong, brown vinyl, with concealed fiber center stay. Soft vinyl lining, two adjustable elastic straps.

No. 8655-0 Standard Armguard

Good protection for a moderate price. Sturdy, brown vinyl. Two adjustable elastic arm straps.

No. 8695-0 Kant-Pinch Hair Tab

Double thick. Cordovan leather with calf hair face. Snaps in place. Has special finger divider to prevent arrow from pinching. Ideal for heavy hunting bows. Specify right or left hand, S-M-L.

No. 8745-0 "Ouchless" Deluxe Tab

Can't bite or pinch. Finest quality, top grain leather. Provides a positive hold for individual fingers. Improves accuracy. Leather reinforced for extra strength, clean release. Specify right or left hand, S-M-L.

No. 8710-0 "Easy-On" Finger Tab

Long-wearing, top grain leather release aid gives the right combination of pliability and protection. Fits either right or left hand. S-M-L.

No. 8715-0 Standard Tab

Tough, smooth leather protection in a tab that fits either right or left handed archers. Specify S-M-L.

A. No. 8730-0 Deluxe Glove

Tough cowhide with elastic webbing. Molded tips. V-shaped cut-outs. Adjustable wrist strap. A high quality glove made for active shooters. S-M-L-XL.

B. No. 8725-0 Standard Vinyl Glove

Long-lasting vinyl, with adjustable wrist strap. A one piece model for archers of all ages. S-M-L.

quivers

There's one for every age, every archer's needs.

No. 9045-0 Custom Compound Quiver

Detachable quiver, custom designed for Pearson Compound models 250, 210 and 200. Rugged and lightweight. Shroud has padded interior to keep broadheads razor sharp and quiet. Gives maximum protection to both the archer and his arrows. Attaches to mounting plate with tape or screws. Ideal for all wooden riser hunting bows of compound or conventional design. Holds 6 arrows.

No. 9025-0 New Safety Designed "Adjust-On" Bow Quiver

Custom, cushioned extra-deep shroud keeps broadheads silent and sharp, shields against accidental injury. Quick and quiet in action. Adjusts to fit any size bow. Heavy-duty, vinyl-coated fingers clasp and protect the bow limbs. Rack holds six arrows ready for your use. The bowhunter's best buy.

No. 8530-0 Hooded Silent Bow Quiver
Safety is the foremost design feature of this economy-priced slip-on bow quiver. It's lightweight, fits on any bow. Heavy-duty, brown leather hood with cushioned lining, protects broadheads and the hunter. Holds 5 arrows. No tape, clamps or screws necessary.

No. 8520-0 Silent Bow Quiver
Soft, molded shoulders fit securely over bow limbs. Can't scratch bow or arrows. Slots hold five arrows ready for action. No tape, clamps or screws necessary.

No. 8525-0 Deluxe Kwikie Kwiwer®
Light, durable, space-saving quiver. Clamps on any bow. Grips arrows firmly, yet allows easy removal. Holds 4 arrows of any standard size. Ready for instant use.

No. 8320-0 Shoulder Quiver
A rugged, brown and tan, two-division quiver that carries 12 broadheads easily and safely. Of durable, scuff-resistant vinyl, with large zipper pocket for accessories. Adjustable leather shoulder and divider straps.

No. 8470-0 Junior Hunting Quiver
For arrows to 26". Has a wide throat for easy arrow removal, a heavy, leather bottom. Adjustable leather shoulder and arrow divider straps. Of durable, claret-colored vinyl, with tan, scalloped cuff.

No. 8340-0 Standard Side Quiver
Soft, expanded brown vinyl, with permanent belt loop. Holds 12 arrows. Keeps arrows convenient, but out of the way. Has a large accessory pocket, pencil holder, and a separate pocket for damaged arrows.

No. 8350-0 New Target And Field Quiver
Claret colored rigid vinyl. Belt clip holds quiver at easy access angle. 12 arrows are held ready at your fingertips. Has roomy accessory pocket and arrow divider strap.

No. 8780-0 Economy Quiver
Low cost, yet tough and long lasting. Carries 12 target arrows or 6 hunting arrows. Brown vinyl, with molded puncture-proof bottom.

No. 8770-0 Young Archer's Side Quiver
Carries 12 target arrows. Has handy belt loop and heavy, puncture-proof bottom. Claret colored, scuff resistant vinyl, finished with a decorative cuff.

No. 5270-0 Ground Quiver
For expert archers, clubs, schools. Upright rod of quiver is designed to contact with horizontal hanging bow. Holds 12 arrows. Bow rack is removable.

cases

Ben Pearson bow cases for every bow — every budget

No. 1530-0 Pearson Custom Hard Bow Case
Professional quality. High-impact molded case. Sleek and sturdy, with durable patterned vinyl cover. Lined bow compartment is fully padded to protect bow handle. Separate foam-cushioned compartment holds up to 2 dozen arrows. Additional, snap-lock, divided compartment for accessories. 70" x 9" x 4 1/2".

B. No. 8500-0 Vinyl Bow Case
Durable black vinyl case with soft flannel lining, heavy-duty zipper. Popular with archers for protection of fine bows. Fits any bow up to 68".

C. No. 8510-0 Flannel Bow Case
Strong, soft flannel with vinyl top and bottom. String tie, pocket on flap for extra bow-string. Accommodates bows up to 68".

D. No. 8550-0 Compound Bow Case
Custom designed rugged black vinyl case, with soft, protective flannel lining and heavy-duty zipper. Offers complete protection and comfortable carrying convenience for Ben Pearson Model 250, 210, and 200 Compounds, as well as other compounds up to 50 inches.

bow accessories

No. 9917-0 Side Mount Hunting Sight

All metal, five pin bar sight. Mounts to side of either right or left hand bows. Fluorescent, multi-color pins adjust for various distances. Has 5" sight bar, black non-glaring finish and positive pin-locking system. Screw or tape on.

No. 9945-0 "Super Sight" by Accra
Has hooded post with positive visibility pin. Adjustable coded sight bar for precision accuracy. Fine tuned elevation and windage controls. 7" sight bar for all shooting styles. A high-performance sight for the serious competitive archer.

No. 9925-0 Hunter Sight
Four position, multi-colored sight settings. Adjustable pins for windage and elevation. 5" sight bar. Double lock insures permanent position. Designed for rugged use. Tape or screw on. Fits all bows.

No. 9975-0 Field Sight
Hooded post for precise sighting. High visibility — no glare sight pin. Easily adjustable for windage and elevation. 5" sight bar. Tape or screw on. Fits all bows.

No. 9955-0 Target Pin Sight
Features a high visibility pin for all light conditions. Double lock insures a permanent, no-slip position. Adjustable for windage and elevation. 5" sight bar. Tape or screw on. Fits all bows.

No. 9920-0 Bow Sight
Adjustable for height and windage. Lightweight, flexible steel. Screw adjustment swivels into position. 5" sight bar. Easily attaches to bow with tape.

bow accessories

No. 1442-0 Bow Sling
Ideal for improving shooting form. Prevents over-gripping of the bow. Cowhide, with adhesive backing for quick and easy installation. No screws or tape. Adjustable. Complete with instructions.

No. 1465-0 Arrow Plate
Self-adhesive pressure plate fits and protects all bows. Use with No. 1891-0 Mohair carpet rest. Ideal for quieting hunting bows.

No. 1550-0 Arro-Guide
Perfect for the beginning archer. Holds arrow firmly in shooting position, ready to draw. Fits right or left hand bows. Self-adhesive for simple installation.

No. 1447-0 Bow Tip Protector
Soft, pliable rubber. Protects bow while stringing. Holds string in place, keeps bow tip like new. Fits all bows.

No. 5228-0 4" Hunting Stabilizer
Fits 5/16" bow insert. Reduces limb torque and improves the hunter's accuracy. Black metal rod with chromed, adjustable weight. Allen wrench is included with purchase for quick, easy adjustment of stabilizer weight.

No. 5280-0 Bow Stabilizer
(3 oz., 1/2" x 24")

No. 5290-0 Bow Stabilizer
(3 oz., 1/2" x 30")

Fits 5/16" bow insert. Reduces bow torque and adds points to the archer's score. Black metal rod with chromed, adjustable weight. Allen wrench included.

No. 1555-0 Flip Rest
Ideal for either target shooting or hunting. Unaffected by weather. Facilitates smooth, quiet release. Stainless steel with self-adhesive backing. Fits all arrow shelves. Pre-drilled for cushion plunger. Specify right or left hand.

No. 1415-0 Para-Rest
Horizontal nylon brush type. Mounts in seconds on any center shot bow. Assures noiseless arrow flight, protects arrows from crest damage. For hunting or target shooting.

No. 1891-0 Mohair Carpet Rest
Genuine mohair for quiet, smooth drawing and release. Padded to insure stable arrow flight. Self-adhesive backing, fits all arrow shelves. An ideal bowhunting arrow rest. Fits right or left hand bows.

No. 1418-0 Hoyt Pro Rest
A non-interfering rest with pressure plate. Provides for positive clearing of vanes or feathers. Retaining finger prevents arrow from falling off rest. Flexible shelf prevents arrow bounces. Self-adhesive backing. Specify right or left hand.

No. 1419-0 Feather Rest
Feather shelf provides arrow cushion. Minimizes arrow whip, increases bow cast. Includes arrow plate and pressure point. Self-adhesive. Fits any bow. Specify right or left hand.

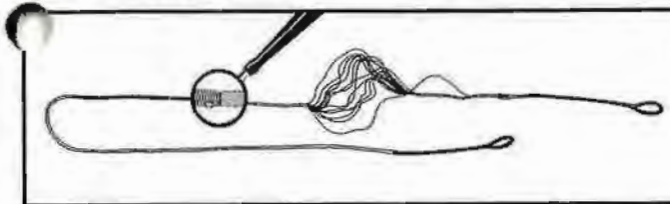

No. 1545-0 Kwik-Lok Arrow Holder
Keeps arrow in a constant "ready" position. Eliminates tired fingers, ideal for cold weather bowhunting. Releases instantly. Quiet, will not spook game. Self-adhesive backing. Fits all bows.

No. 1433-0 Klicker
Improves shooting technique. Spring clicks at full draw, eliminates "freezing" or snap shooting. Made of long-lasting spring steel mounted on leather tab.

bow strings

The preferred, proven high-performance line

Exclusive "Serv-Weld" Process Prevents Unravelling, Assures Stay-Strong Strings.

Utilizing a patented heat fusion process, the tie-off ends of the serving, at the loops and string center, are Serv-Welded to provide an effective lock against the serving's loosening. Each strand of Dacron® custom string is pre-stretched and pre-waxed to further assure strength and durability. The Ben Pearson "Serv-Weld" process is covered by U. S. Patent No. 3,297,013.

For Laminated Bows

No. 6380-0 Our finest quality string. Made from Custom Dacron® with extra large double loops to assure proper fit. Available in the following bow lengths and draw weights. Specify each when ordering.

62" — 25/35 lbs. 35/45 lbs. 45/55 lbs.	64" — 25/35 lbs. 35/45 lbs. 45/55 lbs.	66" — 25/35 lbs. 35/45 lbs. 45/55 lbs.
68" — 25/35 lbs. 35/45 lbs. 45/55 lbs.	69" — 25/35 lbs. 35/45 lbs. 45/55 lbs.	70" — 25/35 lbs. 35/45 lbs. 45/55 lbs.

No. 6390-0 Camouflaged Custom Dacron® strings. Dull olive green for hunting bows 40 to 60 lbs. in 48", 52", 54", 56", 58", 60" and 62" lengths. Specify bow length when ordering.

48" — 40/60 lbs.	52" — 40/60 lbs.	54" — 40/60 lbs.
56" — 40/60 lbs.	58" — 40/60 lbs.	60" — 40/60 lbs.
62" — 40/60 lbs.		

For Compound Bows

No. 6338-0 Camouflaged olive green, heavy-duty Dacron® with monofilament serving. 38" — 40/60 lbs. Fits Pearson Models 210 and 200 Compounds. 40" — 40/60 lbs. Fits Pearson Model 250 Compound.

For Fiberglass Bows

No. 6385-0 — White Dacron® string for fiberglass bows under 40 lbs. Small double loops. Available in 54" and 60" lengths.

bow string accessories

No. 1479-9 Tox-Nok
Heat shrinks nok securely onto string. Gives archer correct nocking point instantly. Neat and efficient.

No. 1434-9 Arrow Nok-Loks
Hold arrow firmly on bow string at any tension desired. You're always prepared to shoot. Shooting hand is freed up, arrow is correctly positioned for every shot. Durable rubber. Easy to install.

No. 1485-9 Kwikee Silencers
String "twang" is eliminated by dampening vibration. Deer will not "duck" arrow or locate hunter by sound. Soft gum rubber. Slip over each end of bowstring. Will not slow bow speed.

No. 1440-9 Bow String Silencers
Eliminate all string noise. A necessity for every bowhunter. Easily attached. Light. Will not slow bow speed.

No. 1492-0 Action Peep Sight
A rear sight, easily inserted in strands of bow string. Insert at eye level when at full draw. Increases accuracy. Improves score.

No. 6650-0 Bow String Wax
New larger size. Protects string strands. Prolongs the life of the string. An archery necessity.

No. 9660-3 Saunders Nok Set With Pliers
Consists of specially designed steel pliers and 3, No. 9630-9 noks. This unique closing tool keeps the nok round while it is being clamped around the bow string serving. Makes nok setting easy and permanent.

No. 9630-9 Saunders Noks.
The perfect nocking point. Inside is coated with rubbery plastic which compresses around the bow string serving and prevents nocking point from slipping. Outside is light weight aluminum band. Fits any diameter bow string. 5 Noks per pack.

No. 1488-0 Action Kisser Button
Used by tournament archers. Increases accuracy of anchor and adds points to score. Installs easily on string serving. Practically indestructible.

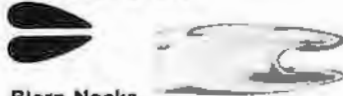

No. 9770-9 Brush Buttons
Keep twigs and brush from wedging between string and bow. Also dampen string noise. Easy to install. Soft rubber.

No. 1446-0 Bow Stringer
The proper equipment for stringing a bow safely and quickly. Eliminates the danger of personal harm and twisting of the bow's limbs. Strings any bow up to 75 lbs. in draw weight.

No. 1595-0 Compound Bow Stringer
Specially designed for Pearson 250, 210 and 200 Compounds. Safe, strong aircraft cable with protective plasticized coating. Absolutely essential to assure protection of the archer and the bow.

arrow accessories

Bjorn Nocks

A precision designed nock for the tournament archer who requires uniformity. Helps the bowhunter hold a "ready" arrow, prevents beginners from "arrow dropping". Strong, rigid molded plastic. One dozen per blister pack.
No. 9641-2 Size: 9/32".
No. 9642-2 Size: 5/16".

Indx Nocks

Our most popular nock. Raised edge enables location of cock feather to be determined by feel. Molded plastic. Red, white, blue, yellow, black, green or orange. One dozen per blister pack.
No. 9650-2 Size: 1/4".
No. 9651-2 Size: 9/32".
No. 9652-2 Size: 5/16".
No. 9663-2 Size: 11/32".

No. 1496-0 Fletcher

Shaft holder has three-leather and four-feather indexer. Kit includes clamp bar and two auxiliary clamps for gluing.

Parabolic Plastic Fletching

Thin, lightweight, glue easily to arrow shaft. Not affected by hot or cold temperatures. Completely waterproof. More economical than other fletchings, extremely durable.
No. 8540-2 3" Target Vanes. (Dozen Pack)
No. 8545-2 5" Hunting Vanes. (Dozen Pack)

No. 9875-0 Broadhead And Knife Sharpener

Puts a keen cutting edge on knives and broadheads. Hold broadhead or knife securely and simply stroke the blade with a firm positive movement of the sharpener. Small and light.

No. 9910-0 Fletching Cement

Strong, waterproof and quick drying. For attaching feathers and nocks to arrow shaft. Bonds to any shaft material.

No. 5220-9 Knife, File & Stone Set

A necessity for every bowhunter. Hunting knife is chromed, high carbon vanadium steel, with hardwood handle, 4 1/2" saber blade. Double tang handle construction, 8 5/8" overall length. Broadhead sharpening stone is natural Arkansas oil stone, precision cut and lapped. File is high grade steel, single cut. Has 4" blade with wooden handle. Overall length is 7 1/2". Case, of top grade leather, has belt loop and carrying compartments for each item.

No. 5210-9 Broadhead File & Stone

Use them anywhere. In the field, shop or home. Keep Pearson Switchblades® and all hunting heads razor sharp. File is high grade steel, single cut, with wooden handle. High quality sharpening stone is precision cut and lapped. Handy leather sheath has belt loops and separate carrying compartments for file and stone.

No. 9935-9 "Hot Melt" Broadhead Cement

Bonds broadheads to all ferrules. Requires only a small amount of heat to soften. Ideal for any tapered ferrule points and broadheads. Use for installing aluminum inserts. 3 sticks to the package.

No. 9550-9 Tapering Tool Kit

Cuts broadhead tapers with ease and precision. Bushings to fit 1/4", 9/32", 5/16" and 11/32" shafts. Oversize to fit painted shafts.

points

New Pearson Switchblade®

No. 9885-9 3 Pack
No. 9885-2 Dozen Pack

The ultimate hunting head. A precision-engineered 4-blade broadhead, honed to scapel-like sharpness. Primary blade is spring tempered carbon steel, welded to one piece steel ferrule. Easily replaceable auxiliary blade locks positively to ferrule. Advanced design features complete exposure of all four cutting edges. Like shooting two arrows in one. White, bronze, yellow or green.

No. 9785-9 Pearson Switchblade® With Switch-On™ Broadhead Adapter

New Pearson Switchblade® 4-blade broadhead with attached Switch-On™ adapter for threading head to wooden, aluminum or fiberglass shafts. 3 pack. White, bronze, yellow or green.

No. 9405-2 Pearson Switch-On™ Wooden Shaft Converter

Converts wooden shafts to the Pearson Switch-On™ system. Durable, lightweight, 5" tapered aluminum sleeve with threaded end to receive all Switch-On™ points as well as other convertible points of your choice. Dozen pack.

No. 9425-2 Pearson Switch-On™ Broadhead Adapter

Adapts Switchblades® or other convertible broadheads for use on wooden, aluminum and fiberglass shafts. Precision tooled high strength aluminum, 5" taper. Dozen pack.

Pearson Switch-On™ Inserts

For aluminum and fiberglass arrows. High strength, lightweight aluminum with universal threading to accept Switch-On™ or other convertible points. Dozen pack. Order according to numbers below.

No. 9411-2 Fits Easton 1918.
No. 9412-2 Fits Easton 2018.
No. 9413-2 Fits Easton 2020.
No. 9414-2 Fits Micro Flite 9.
No. 9415-2 Fits Micro Flite 10.
No. 9416-2 Fits Micro Flite 11.
No. 9417-2 Fits Woodsman HS65.
No. 9418-2 Fits Woodsman HS55.

No. 9815-2 Pearson Switchblade® Auxiliary Blades

Extra steel insert blades for Switchblade® broadheads. Dozen pack.

Switch-On™ Points

Switch points in seconds. Unscrew one and switch to another. Compatible with other convertible-point arrow systems.
No. 9820-1 Field point. 125 grains. (Package of 6)
No. 9840-1 Blunt point. 125 grains. (Package of 6)

Hi-Precision 3-Blade Hunting Head

One of the most popular among bowhunters. Excellent penetration, strong and easy to sharpen. Maintains flat trajectory without wind-planing. Shipped 3 to the package.
No. 9890-9 For 11/32" shafts. 125 grains.

Parallel Target Points

For target shooting. Standard parallel-hole point. Shipped one dozen to the package.
No. 9802-2 For 5/16" shafts.
No. 9812-2 Bullet point for 5/16" shafts.

Five Degree Taper Field & Blunt Points

Standard 5° tapered-hole points for hunting practice and small game. Interchangeable with broadheads. Shipped one dozen to the package.
No. 9843-2 Field point. For 11/32" shafts. 125 grains.
No. 9909-2 Blunt point. For 11/32" shafts. 125 grains.

Parallel Field Points

For hunting practice. Standard parallel-hole point. Shipped one dozen to the package.
No. 9822-2 For 5/16" shafts.
No. 9823-2 For 11/32" shafts.

camouflage accessories

No. 1523-0 Camo Head Net

Mosquito netting material conceals your face but still permits clear vision. Keeps insects off. Can be worn over cap or parka hood. Fits all head sizes.

No. 1450-0 Camo Bow Sleeves

Durable green camouflaged cloth sleeves with elastic cuffs. Fit over both limbs. Sleeves eliminate limb reflection. May be taped at handle and limb tip. Easily removed.

No. 1504-9 Camo Face Paint

Camouflage colors conceal your face. Not affected by rain or perspiration. Easily removed and harmless to skin. Kit includes one tube brown and one tube green.

No. 9870-0 Buck Scent

Guaranteed to attract deer. A few drops give you that "close shot". Counteracts human odor. Unbreakable plastic bottle.

No. 1500-0 Tree Stand

(18" x 15") black heavy-duty steel platform easily attaches to tree to put you above deer. Provides better visibility. Deer come in without seeing you or picking up your scent. For open areas or extra comfort, use two stands.

bow fishing accessories

No. 1535-0 Spin Cast Bow Reel & Bracket

Famous Zebco® 808 Closed Face Bow Reel and Bracket. A heavy-duty, closed face spin cast reel, loaded with 60 feet of 80 lb. test nylon line. Has precision, self-lubricating, stainless steel gears. Bronze bearings disc drag system, durable Lexan body. Bracket tapes to any bow. Salt water resistant.

No. 9990-0 Bow Reel

Efficient one-piece aluminum reel, equipped with spring wire line clip. Sturdy, yet lightweight. Tapes easily to any bow. Loaded with 50 ft. of 80 lb. test nylon line.

No. 9995-0 Shoot-Thru Bow Reel

7", shoot-thru reel mounts easily to your bow and has line holder to prevent line from paying out too soon when shooting at sharp downward angles. Loaded with 75 feet of 72 lb. test nylon line.

No. 9870-0 Double-Barbed Fishing Point

Fishing line attaches to lower section of point, which unscrews from the harpoon head. For 5/16" shaft.

No. 9825-0 "Sting-A-Ree" Fishing Point

Designed for big fish bow fishing. Ideal for gar, sharks and large rough fish. Long, extra-strength design for deep penetration. Large double-barb holds the big ones, retractable design 5/16" shaft size.

No. 1540-0 Reel Bracket

Holds reel squarely and tightly. Light-weight, yet sturdy black metal. Tapes to any bow.

No. 2770-0 Bow Fishing Arrow With Point

Durable solid glass shaft with rubber vanes. Has the weight to penetrate deeply into water. Two-color brush crest. Double-barbed harpoon point unscrews for easy withdrawal from fish. In easy-to-display package.

No. 2820-3 Bow Fishing Kit

Complete with 4" reel, line, barbed fishing arrow and "Tips On Successful Bow Fishing" booklet. Everything you need to shoot all types of game fish.

No. 9980-0 Bow Fishing Line
25 yards of braided nylon line, 70 lb. test. Spins easily off reel.

The Classic[®] Crossbow

by ben pearson[®]

SIX CENTURIES AGO the crossbow gave harrassed footsoldiers the deadly firepower they needed to effectively combat armor clad mounted knights. As time passed, the crossbow evolved into a powerful, accurate weapon of considerable technical refinement. Today, The Classic Crossbow embodies these age old traditions of serious craftsmanship along with modern day engineering advances that make shooting the crossbow a fascinating, exciting sport. A superlatively designed instrument, The Classic Crossbow is as equally at home with the family at the target range as it is adding thrills to hunting or fishing expeditions. Many points of superiority make The Classic Crossbow the logical choice of sportsmen who demand beauty, durability and safety. Consult your state fish and game department for specific regulations concerning hunting and fishing use.

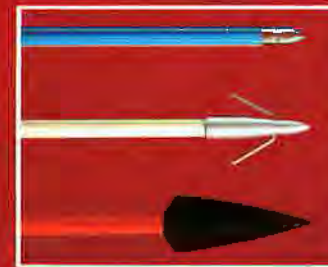

The Classic[®] Crossbow Set
No. 1040-3 One complete set with all the high-performance features required for total enjoyment of the exciting sport of crossbow shooting. Crossbow has powerful 75 pound draw, adjustable front and rear sights with removable centerless crosshair unit for left and right windage, positive trigger lock safety, steel trigger guard and trigger release. Complete with illustrated instructions.

1. Cherry stained hardwood stock with high gloss catalytic varnish finish and handsome checkered pistol grip. Metal foot stirrup for easy cocking. Custom molded black polyvinyl butt plate adds sure shoulder comfort and sharp styling.
2. Powerful new 36" laminated bow with Pearsonite fiberglass backing and double re-inforced tips. Provides a full, 75 lb. draw, with a far smoother release and more accurate cast. Bow has adhesive backed cushion pad. Brace height is 4³/₄".
3. Custom extruded black PVC runners reduce string wear and drag resistance while adding attractive detail to the crossbow's classically beautiful appearance.
4. Three, custom target bolts. Port Orford Cedar with die-cut fletching and color dipped shafts, plated steel nock caps.
5. Two, heavy duty, 28 strand Dacron[®] bow strings. White with black servings, special double loops, tested to withstand 300 lbs.
6. Leather-textured vinyl belt quiver, with belt loops.
7. 250 lb. tensile strength Nylon bow stringer, with rugged top grain leather pockets.
8. Elegant, full color packaging is beautifully self-promoting and entirely functional for both travel and storage. Filmed styrofoam tray has recessed compartments for each item. Tray inserts into heavy-duty protective sheath.

No. 2056-9 Bolt Display Pack
Attractive self-display carton containing 36- 14" bolts. 1 dozen each of Target, Blunt and Hunting bolts.

Bolts
Target
No. 2052-2 - 1 dozen.
No. 2052-9 - 3 dozen.

A BRUNSWICK COMPANY

Ben Pearson® Bow Guarantees

Each Ben Pearson bow is numbered and accompanied by a registration card. This card must be filled out and mailed to Ben Pearson, Box 7465, Pine Bluff, Ark. 71601, WITHIN TEN (10) DAYS AFTER PURCHASE. If failure occurs in a registered bow, Ben Pearson will repair or replace it per below, providing the bow does not show evidence of misuse, improper handling, or limb damage due to improper stringing.

Before returning bow, write explaining details of the failure. Include bow name, serial number, weight and date of purchase. We will mail shipping instructions and a form authorizing your shipment. We will not be responsible for unauthorized shipments.

Laminated Bows

DURATION OF OWNERSHIP	First 12 months from date of purchase	12 to 18 months from date of purchase	18 to 24 months from date of purchase
REPAIR OR REPLACEMENT CHARGE	NO CHARGE	25% of Purchase Price	50% of Purchase Price

Guarantee is transferable, provided original owner registered the bow within 10 days, as stipulated above.

Classic® Crossbow

Each Classic® Crossbow is guaranteed for a period of six months against defects in workmanship and/or materials.

Guarantee is not transferable.

Pearson Compounds

Both limbs and riser are guaranteed for one full year against defects in workmanship and/or materials. Compound hardware (all bow appurtenances, excepting string and rest, which are a part of the manufacturer's original equipment) is equally guaranteed for a period of six months. Guarantee is not transferable.
