

**The Right Team.  
The Right Solution.**  
*Every Time.*

## WASTE LESS, SAVE MORE

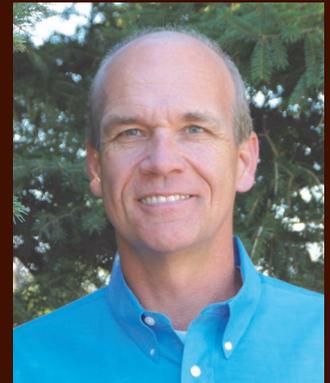

*How can we waste less and save more?* It's the question all building managers are asking these days. By being green and conscientious, you save green. It means doing the best job with what you already have.

Instead of another energy audit, you need experts from The Vanella Group (TVG) to help you mine information, and evaluate and prioritize your

energy sustainability plan so your facility can be a high performance machine.

TVG believes in long-term relationships based on teamwork to meet your specific goals. We celebrate what you've done and guide you to excel even further.

**Vince Vanella**  
*Owner/President*

### WHAT WE DO

The Vanella Group offers sustainable management programs for your existing facilities of all sizes. There is obvious value in basic green practices, and we partner with you to take it to the next level. Working with TVG offers you our vast experience and scope of services that can be customized to your unique portfolio. Our experience provides direct cost containment and reduction, a real understanding of how to control energy costs, waste streams, and optimize recycling and waste reduction programs. As independent consultants, we find proven, safe and high performing contractors that we retain based on your specific needs.

### HOW WE DO IT

Count on TVG to be your experts for energy efficiency and savings, trends with high performing buildings and new technologies. We offer a thorough analysis and recommendations for your existing systems. These services are provided by a network of partners with high quality, specialized experience. Since every business is different, we tailor our program to fit your needs. We have extensive experience partnering with companies and organizations to bring out their green, or make their green, greener.
