

## 415 Squadron Crews – ARGUS ERA – Summerside 1961-1969

Long Range Patrol (LRP) crews are normally fixed crews rather than crews which are assembled for a given mission. This approach is used to maximize crew readiness. The premise is that the more a given crew operate together, the more likely they will operate at higher levels of proficiency. Throughout the Argus era, 415 Squadron operated with fixed line crews. Despite the desire to maintain the membership of a given crew, at times it is necessary to change personnel (postings, promotions, courses, illness ...).

The crew lists are sequenced by year and are only as accurate as the records available to the 415 Squadron Association. The initial goal is to confirm the Crew Captains for each year. When crew photos and crew lists are acquired, they will be included with this record. It is expected that this will be an on-going initiative, which will require frequent revision. Any errors or omissions in the information listed below are not intentional and the 415 Squadron Association would be pleased to receive any input, including additional crew photos and crew lists, which would enhance the accuracy of this record.
