Jerry Straub

A man with a vision.

A man with a dream

A man with talent.

These are just a few of the qualities of Jerry Straub. Grandfather of seven Huntington Little League #3 players, Jerry Straub was the person who visualized this complex. He then went on to design, engineer, and build every aspect of the brand new facility. From electrical system layout to drainage systems he took it from conception to reality.

Jerry Straub donated thousands of hours of time to help save League #3. He envisioned a state of the art facility that would host the best tournaments in the country. This is the 4th year of the "new League 3" and during these past four years, we have hosted the 10/11 state tournament, the Southeastern 9/10 Regional Championship, the 11/12 State Championship, and now the 9/10 state championship as well as co-hosting the 2011 regional championship.

He did this because of his love of family, his love of baseball, his love of community. He wanted to help build something that future generations of children would be able to enjoy. Please look around and notice the details of this facility and realize that every inch of it was designed and built around one mans dream. It is easy to say "Job Well Done."

On behalf of Huntington Little League #3, The city of Huntington, and future generations who will enjoy this facility, we salute Jerry Straub for his exceptional commitment to little league and children.

Thank you!!!

Huntington Little League #3
