RE: Reference Letter for Allen Fuller

To Whom It May Concern,

Allen Fuller provided specification services for the Winter Park Memorial Hospital Imaging and Cardiovascular Services project. He assisted in pulling the specifications together, providing technical guidance during the design and in providing quality control review at the end of the construction document process. His experience with specifications and with many construction materials proved invaluable throughout the project. I would highly recommend his services.

Sincerely,

Bryan T Emde, Architect AIA, NCARB
Rogers, Lovelock & Fritz, Inc.
