Dave,

Your understanding in this email is correct.

Anne

Subject: Recreational Vehicle Parking

This Email is to request that my comments sent to you on Friday be withdrawn. This is based on a rereading of the ordinance by me. I had been reading older versions which gave me the impression that 5 foot screening was required.

My understand now is that one rv or trailer can be stored anywhere in the front yard area including the setback without screening. If this the case Ill not be speaking or attending the meeting. Please let me know if my reading is incorrect.

I also understanding other rv's or trailers can be stored in enclosed structures or behind screening. Sorry for the misunderstanding but the wording is confusing and I was looking for the worst case not the best which this seems to be.

Dave Johnson
