

UAM Notes/Updates

Posted 9/5/18

“On July 30, 2017 the 2017 UAM was adopted and OSP was revised to reflect the new permitting requirements. Consequently, if a permit was approved prior to OSP being revised, there was no way to close it out using the old system after July 30, 2017.

What needs to be done is the following

1. For permit approved prior to adoption of the 2017 UAM (July 30,2017) the UAO must sign the hard copy of the certification section of the permit and go into OSP under TAB 7 and upload the hard copy and select construction complete.
2. Permits approved after the 2017 UAM was adopted, the UAO can certify the permit as complete within OSP electronically under Tab 7.

In cases where FDOT has selected construction complete, then FDOT will upload the hard copy of the certification section of the permit signed by the UAO.”
