**He who gives to the poor,
lacks nothing...Prov. 28:27**

**August 2015
Nicaragua**

Same age

Our group

This boy I saw about 10 years ago. He was a baby dying in a rural village. We located a cardiovascular surgeon in Managua who agreed to operate. He is healthy today and alive. It was a miracle finding a surgeon to take the case but God works all things for the good of those who love and serve him. Romans 8:28 .

Struck by lightning

When he was younger he was struck by lightning. They took him to see the local medical care person. He was told to never go to school-and he did not go to school. A sad case. He seemed very intelligent as we spoke but lacked schooling to get ahead. This couple lived next door to the "free clinic."

Leon Training Hospital

Leon has a medical school and hospital to train the next physicians.

Hospital room

A hospital room seen from the street. They have IV fluids going. Some use air conditioning and some not.

Doc and unsure patient

As we minister over the years in Nicaragua, the patients appear healthier with many improved physically and spiritually. It is also good to see the middle class growing stronger. Of course that means prices are increasing to the long term benefit of all. As an example Iguanas sell on the roadside at 3 for \$10 now.

Jennifer, ER Nurse

This was Jennifer's first trip. She was always smiling and showing the love of Jesus to all she ministered too. It was a real blessing to have her on the trip to keep all of us full of joy. Hilda was her usual bubbly self, full of joy. She has been helping us for many years.

Open wide...

...my turn now doc!

Iguanas for lunch
