PUSH BROOM DEGREES OF SWEEP

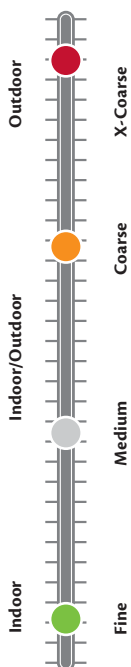

Push brooms are available in fine, medium, coarse, and extra-coarse. The scale is directly proportional to the size of dirt and the strength of the broom's fibres.

Fine sweeping: For sweeping dust and dirt on smooth indoor surfaces such as polished hardwood and vinyl. Fine fibres are flagged on the ends to increase softness and dust attraction when the broom glides across smooth hard indoor surfaces.

Medium sweeping: For indoors and outdoors on less smooth surfaces such as terrazzo, sealed or unsealed concrete. Medium fibres are used when a multi-purpose neutral sweeping action is required. When used outdoors, the broom works best on even surfaces with smaller debris.

Coarse sweeping: For heavier outdoor dirt and debris on uneven surfaces such as asphalt and concrete. These brooms offer a good compromise between surface drag and the ability to sweep larger sized material.

X-coarse sweeping: For outdoors on rough, uneven surfaces such as sweeping and pushing debris on streets or using in a landscaping application. These brooms have the most surface drag so they are harder to push, but move the largest size and amount of material possible.

SAFETY ORANGE PUSH BROOMS

- Fine and medium sweep brooms are used for sweeping dust and debris on smooth indoor surfaces such as warehouse floors
- Use coarse sweep brooms to move heavier debris on outdoor surfaces
- Bolt-on handle (JB655) and brace (JB783) sold separately; braces are recommended on push brooms 24" and over
- Brooms are pre-drilled for easy installation of brace and bolt-on handle
- Fibre colour is orange for high visibility in warehouses or road crews in construction applications

CORN BROOMS

Corn brooms are available in light, medium, heavy, and extra heavy-duty service. The scale is directly proportional to the weight, durability and the strength of the broom's fibre.

Light: Designed for indoor. This broom is often used as a lobby or dust pan broom to sweep smaller amounts of dirt.

Medium: Multi-purpose indoor broom that is lightweight and used as a commercial corn broom for office buildings.

Heavy: Good outdoor industrial quality broom. The construction has more weight and reinforcement, and is designed for durability.

X-heavy: Mainly an outdoor broom and is the heaviest of our corn brooms. Use this broom to remove large amounts of dirt and snow from entrance ways.

FOOD HYGIENE CLEANING SUPPLIES

Cleaning tools in our Food Hygiene section are manufactured specifically for food processing and other hygiene critical areas. The brush range complies with all existing Canadian, EU and US public health regulations and have been designed to allow sanitation managers to do their job with greater confidence, ease and efficiency.

As HACCP programs are increasing in importance in North America, the right cleaning tools are a key part of ensuring compliance with your company's HACCP program.

Food hygiene tools are made from materials deemed as safe and can come in contact with food or surfaces used in the production of food.

FOOD HYGIENE, COLOUR CODED PRODUCTS (HACCP)

Hazard Analysis and Critical Control Points (HACCP) is a guideline for ensuring hygiene safety in food processes.

The guideline analyzes possible chemical, physical, and biological hazards within processes that should prevent unsafe food from leaving the Critical Control Point (CCP) zone. HACCP can be implemented in any food sector from production to transportation. It encompasses a field-to-fork approach.

Colour coded hygiene tools provide clarity and control by monitoring CCP zones for specific, approved, colour coded tools.

The following colours are used in the food hygiene system.
