

Studio On The Go is a federally recognized 501c3 non-profit organization that offers mobile technology and engineering programs for after school and summer programs.

We help students explore their creative gifts and abilities as a team and teach students skills that can lead to a fruitful future or career. In our programming your students learn the following:

### Music Appreciation

- How to write and compose music
- How to operate and play musical instruments and equipment
- Creative musical expression
- Music industry history

### Video & Film

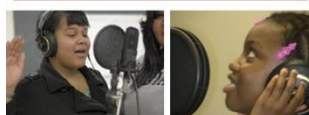

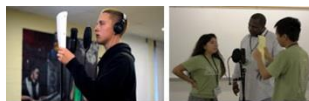

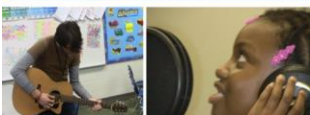

- How to make a music video
- Operating video equipment
- Photography and basic picture taking skills
- Safety on the Internet

### Radio & Internet

- How to operate and run an internet radio show
- The functions and management of a radio station
- Proper interviewing skills
- Proper speaking etiquettes

### All of our programs lead to:

- Leadership development
- Character building
- Exploration of new and possible untapped gifts & talents
- Public speaking
- Personal branding
- Team building
- Self-esteem & image building
- Mentoring for underprivileged youth

**Studio On The Go** (formerly Bangtown Studios) is an impactful community program assisting underserved communities by fostering the musical talents of more than 3,000 students in more than 60 locations since 2006. During our programming the students learn how to write and compose music, operate and play musical instruments and equipment through creative musical expressions as a team. At the completion of the program students will have an opportunity to hear and see the final rewards of their hands on creativity and learning. We take pleasure in helping many of the students who are at risk and in need of a mentor and friend.

**Radio On The Go** is an educational blended learning program opportunity for students who wish to learn more about careers in broadcast/journalism technology and social media as they explore the entrepreneurial benefits of the internet. Youth are spending more time on the internet and as educators and mentors we feel our job is to help 'guide and assist' our young people through this new era. Our platform provides a powerful resource to help you prepare your students for the airwave of internet careers and entrepreneurial trends, in the form of hands on opportunity for students to host and 'work' an online school radio show. Students **collaborate by sharing; voices, music and messages.**

**Photography On The Go** has expanded to include video production and photography courses that will teach youth the ins and outs of creative photo shoots and some a film and video. Students will learn how to story board, scout for scene locations, write scripts, cinematography, how to direct and be a mini producer.

## **ORGANIZATIONAL HISTORY**

The founder of the Studio On The Go program is Mr. Pharlon Randle, a Flint native who saw a need to help empower and educate at risk youth who were being 'lost' to gangs, crime and violence. 10 years later he has grown this organization to help many youth ages 6-21 to understand the talents and skills they possess. Now, Studio On The Go, Radio On The Go and Photography On The Go is opening a door of technology and engineering for many inner city youth that may not otherwise have hope or an opportunity to explore their future.

Students can explore creating and composing musical engineering through Studio On The Go or create an internet radio show through Radio On The Go and see the world through the eyes of colorful images through Photography On the Go.

Our programming can offer you highly qualified, trained technical Instructors and mobile studios that will come to you. We will base classes around your organization or school schedule and student needs based on 6 week intervals. We can also develop extended or yearly programs for your school or organization.

## **Studio On The Go**

(6 Week Programming/ Extended weekly programming available)

WEEK 1: Program introduction and current learning assessments

WEEK 2: Musical notes and technical equipment

WEEK 3: Song construction

WEEK 4: Recording, editing and mixing

WEEK 5: Practice and review song

WEEK 6: Listening celebration party

## **Radio On The Go**

(6 Week Programming /Extended weekly programming is available)

WEEK 1: Program introduction and current learning assessments

WEEK 2: Radio history and business industry

WEEK 3: Technical radio studio equipment

WEEK 4: Interviewing skills and image

WEEK 5: Recording

WEEK 6: Radio show launch party

## **Photography On The Go**

(6 Week Programming /Extended weekly programming available)

**WEEK 1: Program introduction and current learning assessments**

**WEEK 2: Photography and video technical equipment**

**WEEK 3: Focus, recording and editing**

**WEEK 4: Lighting and photo taking tips**

**WEEK 5: Photo shoot**

**WEEK 6: Photography showcase**
