

Longhorn Organics

Environmental and Aquatic Consulting

Daniel Agee joined the Longhorn Organics team in October 2016; he brings extensive background in leadership, electronic technical support, and automation & controls expertise. During his 9 year service in the U.S. Marine Corps Daniel led many Marines on four overseas deployments. While in the Marines he transitioned from Infantry to Avionics Technician. He quickly excelled in his position to join the Quality Assurance team.

After leaving the U.S. Marine Corps, Daniel continued to utilize his Avionics knowledge for Honeywell Aerospace as a Senior Technical Support Specialist for business class jets. In this position he analyzed technical issues and determined the corrective action plan to support and resolve challenging field issues at both component and system levels. Daniel also collaborated with internal departments for issue investigation and resolution.

This position led Daniel to a career with Siemens Building Automation as a Building Automation Controls Technical Support Specialist. He provided remote on-line technical support services, troubleshooting, and diagnostics on building automation systems for end user customers. Here he received all incoming technical support requests related to building automation, HVAC mechanical, controls systems, fire alarms systems, and security control systems. Daniel also completed software and database correction, repairs or adjustments and calibration on automation systems and components.

Daniel is a valued member of the Longhorn Organics construction team as a Superintendent, a heavy equipment operator, and a factory trained HDPE pipe welder. Daniel has used his prior experience managing quality assurance and his hands on skills installing and repairing complex electronic applications to support and assist Longhorn Organics in bringing several key projects to a successful completion. Daniel brings with him several industry qualifications including:

- OSHA 10 Certified
- Forklift Operator certified
- Skid Steer Operator certified
- McElroy Fusion Technician certified
- Secret Security Clearance
- Aviation Technician Organizational Level
- Communication, Navigation, Identification Organizational Level Maintenance
- Night Targeting and Navigational Thermal Imaging Systems Organizational Level Maintenance
- Infantry Squad Leader
