

At JK Architecture Engineering we believe that lifestyle and great design go hand in hand. Our offices are in Auburn, CA (Endurance Capital of the World) and Tahoe City, CA (Lake Tahoe...need we say more!), and Reno, NV. You will be joining a 30-year successful award-winning engineering and architectural design team in the Tahoe City office. We are community oriented and family focused. If you are looking to join a great firm, work with a staff that is energetic and motivated, and seek excellent benefits, JKAE is the place for you. If you meet the position requirements listed below, we would be excited to review your qualifications. This is not just a job, but a life style.

DESCRIPTION

An immediate full-time position is open for a Project Engineer with a primary focus on structural engineering. This position currently resides in our Tahoe City office but could be based in our Auburn office for the right individual. Candidates must be experienced in residential, commercial, and resort/hospitality engineering and design. A significant portion of our work is wood/timber framed construction throughout the Tahoe/Truckee area, which requires design for significant snow loads and seismic requirements. We are also seeing an increase in commercial projects as we grow outside the Tahoe Basin with projects throughout Northern California and Nevada. The structural department services projects initiated within JKAE, as well as from our broad client base, which includes private developers, outside architects, public agencies, contractors, and homeowners.

RESPONSIBILITIES

- Provide structural engineering expertise on varying levels of projects.
- Handle multiple projects simultaneously with minimal oversight, beginning with predesign and stewarding the project through construction.
- Critical knowledge components include wood/timber framing, steel, concrete and masonry design.
- Coordination with clients, governing agencies, and contractors.
- Conduct site and agency visits to ensure project timelines are met.

QUALIFICATIONS

- Bachelor's degree in engineering required
- 4 to 8 years structural design experience
- Professional Engineering (PE) licensure in California and/or Nevada required, Structural Engineering (SE) licensure a plus
- Strong background in wood framed construction
- Significant experience with medium and large construction projects utilizing steel, concrete and masonry construction
- Understanding of codes and constructability
- CAD and/or Revit skills a bonus
- Adapt to changing situations on a daily basis
- Exceptional organizational skills
- Precise verbal and written communication skills
- Ability to communicate effectively with clients, agencies and contractors is required

INSTRUCTIONS FOR SUBMITTAL

Please submit in PDF format only the following:

- One-page cover letter briefly describing your relevant experience and interests
- Resume

Please email the above items to anda@jkaedesign.com.
