

LRCC Club Members;

The Parks Department, by order of the governor, is requiring all groups who lease land from the Parks Department to develop follow and communicate a COVID plan following CDC guidelines. There were several documents that we had to sign and agree to follow. One document, attached, is our specific plan to how we will prevent the spread of COVID. If you wish to see the other documents just send me an email at garyesterle@twc.com. One of these documents is very lengthy so I did not include.

While the LRCC club officers will not be policing this plan I do ask that each of you take a minute to read and follow it.. There is also a copy hanging in the club house on the bulletin board. The reason is if a Park employee is at the field we need to be sure to be following this plan. One of the documents I signed states;

“*Statement of Compliance*

“All practices and competitions will comply with current guidance as provided by KHSAA, Kentucky Office of the Governor, Center for Disease Control and Prevention, and Louisville Metro Public Health and Wellness. Louisville Radio Control Club hereby understands the regulations and restrictions currently in place and agrees to operate in accordance with the above guidance.

Further, Louisville Radio Control Club hereby understands that failure to comply with COVID-19 guidance and regulations could result in enforcement actions including, but not limited to cancellation of practices, competitions and retraction of any relevant permits, licenses or approvals.”

Bottom Line; **WE COULD LOSE OUR LEASE!**

I appreciate your cooperation on this matter. Would hate to have our field shut down for the summer or worse.

Gary Esterle
President – LRCC
