

# SHORELINE MANAGEMENT PLAN

## SEDIMENT CELL - FLAMBOROUGH HEAD TO GIBRALTAR POINT

### DEFINITIONS AND LINKS

1. **SMP (SHORELINE MANAGEMENT PLAN)** – A large scale assessment of the risks due to coastal processes, erosion and flooding (including sea level rise). Strategies to reduce the risk to people and the environment implemented in a sustainable manner.  
4 major strategies are possible - HOLD THE LINE  
MANAGED RETREAT  
NO ACTIVE INTERVENTION  
ADVANCE THE LINE
2. **NNR (NATIONAL NATURE RESERVE)** – Set up to protect important habitats, species and geology. To provide opportunities to educate about the environment and nature conservancy.
3. **SSSI's (SITES of SPECIAL SCIENTIFIC INTEREST)** – Designated to manage, conserve and protect the natural heritage of a site. Concerned specifically with the diversity of plants and animals and natural habitats.
4. **BAP (BIODIVERSITY ACTION PLAN)** – For the preservation of biodiversity, particularly priority species that are most threatened. Habitat review, conservation and restoration.
5. **HERITAGE COASTS** – There are 43 of these in the UK. They have special scenery and environmental value that needs protecting from development.
6. **RAMSAR** – Following a convention on wetlands an intergovernmental treaty was set up to conserve and maintain world wetlands and their resources.
