

Product Description:

RT8 is an acidic multi-purpose descaler formulated to dissolve and remove lime-scale, milkstone, uric salts, iron stains, rust, alkaline, detergent residues and other mineral deposits. Superb on chrome fittings, shower heads and shower screens as well as floors, walls, sanitary ware, cubicles, showers, tiles and poolside areas. Can be used for a wide variety of spray & wipe cleaning tasks for housekeeping applications.

RT8 is suitable for descaling water pots, coffee machine pipes including bean-to-cup machines. It is easier and quicker to use than coffee machine descaling tablets, with no need to wait for tablets to dissolve.

Typical Uses

Use to descale all surfaces, equipment, fittings, and floors that are in constant contact with water.

How to use:

for cleaning:

Use RT8 full strength. Spray on surface to be cleaned. Allow for 30 seconds while RT8 chemically soften and penetrate scales. Use brush or pad to agitate the areas. Rinse with clean water. For better shining result, dry surfaces with a towel after rinsing.

Descaling kettles/coffee machines:

Use RT8 full strength. Place 20mL of RT8 into a kettle with 500mL of water. Switch on power. Allow for 30-60 seconds while RT8 chemically soften and penetrate scales. Use brush or pad to agitate the inside after draining the water. Rinse with clean water several times to insure it is chemical before use.

Available Packaging:

5 liters
6x1000 ml

Refer to SDS before
using the product.
