

Chess

Creating Brighter Thinkers

Who can join?

Any student regardless of level can learn and enjoy the game in this promising chess program. Students who have discipline and good listening skills will truly benefit themselves in thousand folds.

What are the lessons?

This chess program will be divided in different levels varying from beginner, intermediate, and expert level. (depending on their ELO rating) Learning the fundamentals in opening, middlegame, and endgame are to be learned in progression. There will be a lesson plan according to their respective level.

Why Chess? (Educational Benefits)

- Promotes Discipline
- Develops Logical Thinking and Problem-Solving Skills
- Enhances Memory
- Improves Concentration and Focus
- Rewards Correct Decision Making
- Expands Visualization and Spatial Awareness
- Encourages Creative and Lateral Thinking Skills

How it works

I guarantee huge improvement in terms of ELO rating. Before coming in this chess program, try playing in chesskid.com for at least ten games worth of rated games. ELO rating is the actual gauge to identify his/her own chess level. No matter what rating he/she has, I can double or even triple their initial rating if the student is willing to listen and apply the lessons. Again, discipline and listening skills are important. Success in chess depends upon the effort of how the student can learn from this chess program.
