

Art Masters is an art program that teaches the students about a new artist six times a year. Students learn about the artist's style of art and how the culture of the time influenced him or her. Parents are an integral part of the program and attend a session to learn about the artist and the project reflecting his or her work. Then, parents teach the lesson in the classroom to the students and the teacher is present to give you a helping hand should you need it. More information will be coming home with sign up information. Please consider volunteering for this fun job!
