**** Register by November 15 through the website and save an additional \$50 on both classes! (\$449)**

ABOUT LATENT PRINT PROCESSING TESTIMONY

This 8-hour training class is designed for students and forensic science practitioners whom may be tasked with the examination of physical evidence and testify as an expert as to any latent impressions developed on evidence.

This training course will focus on the sequential development techniques used to develop latent print evidence at a crime scene or on physical evidence submitted for examination. Students will learn the sequential processing methods commonly used on non-porous, porous, and semi-porous surfaces as well as the development of blood impressions to be able to fully articulate these techniques and articulate their applications.

Students will also be instructed in the best practice of evidentiary photography, learning the admissibility standards and reasoning for these applications. The current legal standards for expert admissibility and discovery will be discussed in order to allow those in attendance to best understand the legal standards to this type of expert witness testimony and discovery.

This course has been approved by the IAI Latent Print and Crime Scene Certification Boards for continuing education towards the certification programs, and may be applied to the testimony training criteria.

Please bring a mask with you to ensure compliance with University guidelines during the course timeframe

Additional Discount when also attending Overall Latent Print Processing, January 9-11, 2023 (\$499 Total)!

\$199

****Registration Deadline is December 31, 2022!**

ABOUT YOUR INSTRUCTOR:

Andrew R. Reitnauer is a Certified Senior Crime Scene Analyst (CSCSA) through the International Association for Identification. For the past 18 years, he has been an active Latent Print Examiner, Crime Scene Responder, Technical Leader, and Section Supervisor. In addition to casework duties, Andrew has also served as a primary trainer for new examiners and outside agencies, and an active IAI Divisional Member. He is also the founder of Delta Forensics and creator of the Delta Forensics Virtual Academy.
