

Lacking Support

Guess the words defined by the following clues. The answers vary in length from three to eleven letters long and of these, two are capitalized, one is foreign, two are acronyms, two are hyphenated, and one is an alternate spelling. The punctuation in the clues may or may not help the solver.

Enter the answers in the grid one after the other starting in the top left corner and in the same order as the clues. Across words that don't end at the rightmost square of the row will continue on the leftmost square of the next row. Similarly, down words that do not end in the bottom square will continue at the top of the next column.

Six across words and six down words will have to be shortened to other valid words in similar fashion before they are entered in the grid. In addition, four other across words and four other down words will each have to have a letter removed first. These eight letters taken in order will form a common phrase in keeping with the twelve changes.
