# Athletes aren't born.

**There's talent, but that can only take you so far.**

Big League hitters don't just wake up one day, walk out on the field and start crushing the ball. They wake up every single day, earlier than the rest, and work on their game. Fielding balls. Lifting weights. Never letting distractions get in their way. The game—any game—demands that kind of respect. No matter the level you ultimately achieve, when you give that respect, the game returns the favor.

**In sports, there are no overnight success stories.**

Marucci knows this. We started in a workshop with an idea and a flawless piece of maple. Then we spent hours upon hours perfecting our craft. No grand dreams of fame and fortune. Just a commitment to the few who are truly committed. The game teaches lessons that translate to life success. We provide tools for the best players to win in baseball and life – in the form of precision equipment and elite training, so that these dedicated athletes can play to the very height of their abilities and, by doing this, they pay their respects to the game, and to themselves.

**It's quite simple, really: There are no shortcuts. No easy routes. Just hard work and hustle. When you play that way, you**

**HONOR THE GAME.**

# BAT TECHNOLOGY

Marucci has engineered years of ongoing research, feedback from some of the game's best players, and the latest technology into our aluminum, composite, and hybrid lines to produce some of the hardest hitting, highest performing bats available.

## COMPOSITE BARREL

Using ring-free barrel technology, Marucci's composite barrels are individually handcrafted, ensuring superior attention to detail, and individually optimized by size for maximum performance from every bat length.

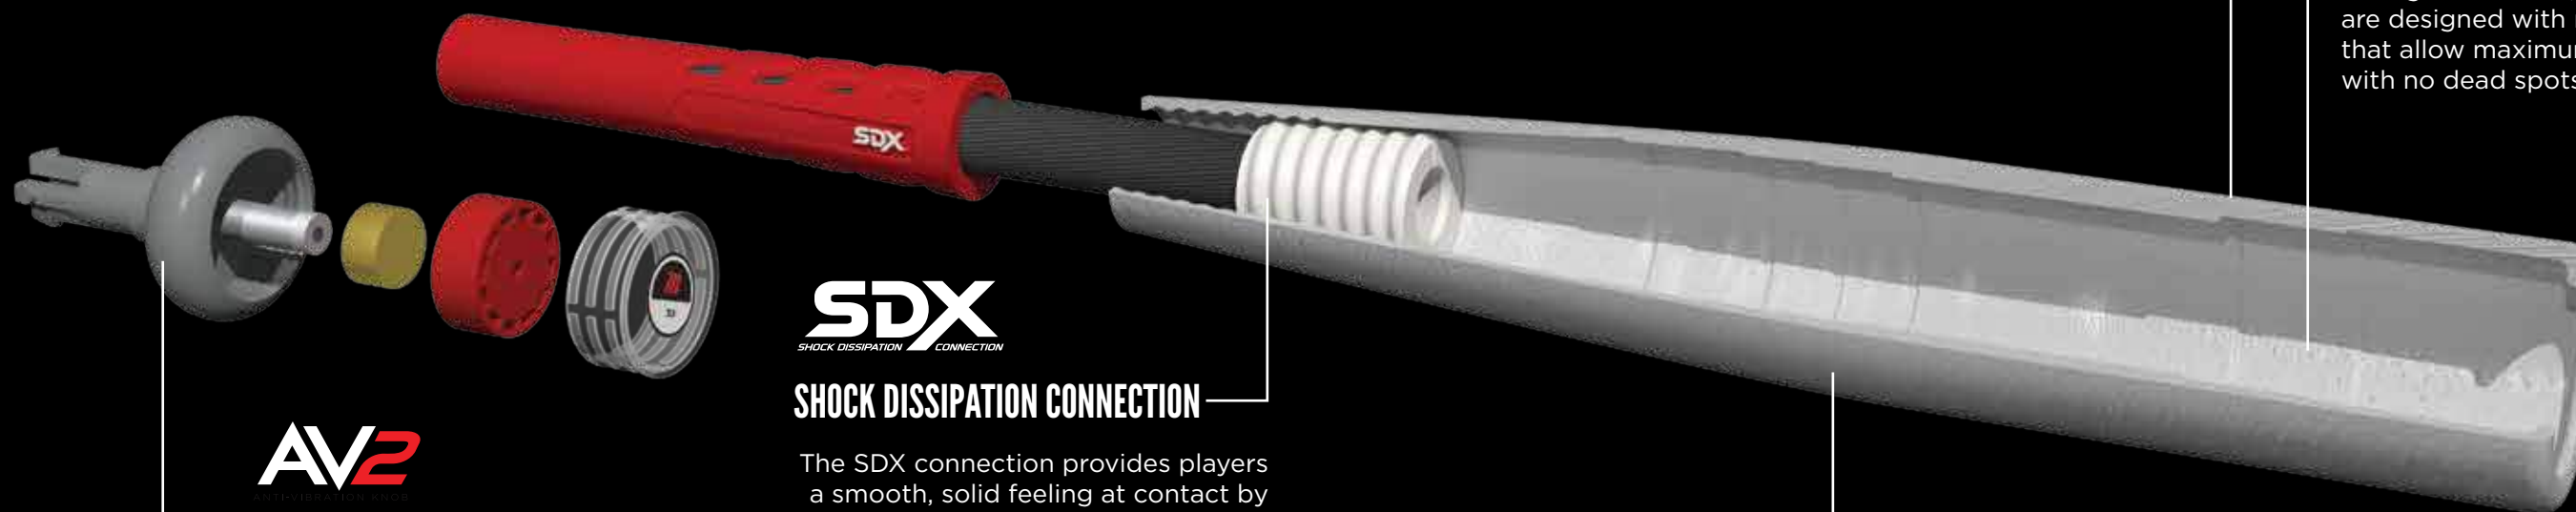

## RING-FREE TECHNOLOGY

In order to meet performance standards, other bat companies craft internal governors, or rings, into the thin-wall barrel which prohibits those spaces from bending, thus decreasing the massive trampoline effect and resulting in a "dead" feeling on contact.

Through expert design and stronger materials, all Marucci bats are designed with ring-free barrels that allow maximum performance with no dead spots.

## MULTI-VARIABLE WALLS

With increased tinsel strength and a higher response rate of Marucci's alloys, barrels can be designed with up to seven variables of wall thickness. More variables create a larger area of thinner wall, otherwise known as the "sweet spot."

## AV2 ANTI-VIBRATION KNOB

The AV2 knob is the second generation of Anti-Vibration Knob technology, featuring a finely tuned and upgraded harmonic dampening system for better feel and less negative vibrational feedback in hitters' hands.

## SDX SHOCK DISSIPATION CONNECTION

The SDX connection provides players a smooth, solid feeling at contact by dismissing vibrations giving hitters total confidence at the plate.

## ADVANCED ALLOYS

### PROFESSIONAL CUT

MEFMPC	\$99.99	SIZES 31-34"
--------	---------	--------------

When a Big Leaguer orders bats from us, those bats are handcrafted to his exact specifications, or his preferred cut. However, there are instances when these cuts do not meet his exact specifications of length, weight, balance point, handle or knob shape, etc. That bat is pulled from the player's order

and sold as a "Professional Cut." These are not considered "blem" bats; they simply did not match what the player requested. Customers can choose their length and color, but Pro Cuts cannot be selected by model.

### CS2 ASH | FUNGO

MAFCS2-BK	\$49.99	SIZES 35"
-----------	---------	-----------

To stay in the lineup, players need to be as sharp on defense as they are at the dish. Designed to be the ultimate wood fungo bat, the Coaches' Series

fungo is handcrafted from the same top-quality ash used on our Pro Model bats for superior performance and durability.

# SMART BAT

## SWING SMARTER. HIT BETTER.

The Marucci Smart Bat captures your most precise swing data using with 11 different metrics in four core swing categories: speed, power, quickness, and control. With no external attachments, the SwingTracker sensor by Diamond Kinetics fits securely within the knob of the bat, allowing the most clean, consistent, accurate swing with no added weight or bulky restrictions.

### SWINGTRACKER APP

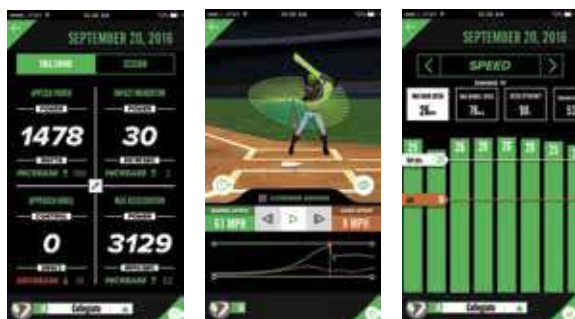

The SwingTracker sensor captures motion data in real-time and sends it to a paired mobile device via Bluetooth. View metrics in easy-to-read graphics and charts or sync with a unique 3D image or video of your swing. Free iOS app available through iTunes.

### DIAMOND KINETICS SENSOR

MDKNSR-0S | \$149.99

Purchase of sensor comes with one year subscription to the DiamondCLUB through the SwingTracker app.

Without Ri-pel™ Lens

With Ri-pel™ Lens

## Ri-pel™ | Easy to clean & Moisture Repellent

Ri-pel™ is an outstanding hydrophobic & oleophobic technology manufactured by Carl Zeiss Vision which offers 3 different performances in one single coating:

- **Water & oil repellent:** dirt, water, sweat, salt, oil, sunscreen and dust slip off the lens surface easily, ensuring uncompromised vision.
- **Anti-smudge:** resistant to fingerprints and other contaminates.
- **Easy to clean:** dirt and smudges are removed effortlessly.

**Invisible but effective:** being a transparent coating Ri-pel™ can be applied on both the back and front of the lens and on top of other treatments without altering the tint performance.

**Field of usage:** Ri-pel™ is ideal for sport and outdoor activities - like sailing, fishing, cycling, golfing, skiing etc. - but also for everyday use.
