There was discussion about partnering with NCT in developing regional protocols for all levels of EMS providers in the counties included in the NCRTAC. The committee was very supportive of the project and recommended budgeting the cost of the APP in an open access format would be appropriate at a yearly cost of about \$600. Antigo Fire & Wausau Fire reported good experience with the APP for their EMS Services. Dr. Gordon and Michael will work with Andrew & NCT to include this project in the upcoming OOH budget.
(See attachment.)
