

Superior Flowering With C20™

Case Study #4:

“Feed the soil microbes that feed your plants”

Photos courtesy, Busy Bee Services,
Cleveland, Ohio

Flowering is significantly enhanced on plants where the soil has been treated with C20™.

The azalea on the right was treated with a soil surface application of C20™ in the fall of 2015. It's companion on the left was not.

The effects of C20™ on flowering (more and larger flowers) were visible in the 2016 growing season.

C20™ is ideal for treating trees, shrubs, and flowering plants in yards, gardens and landscapes.
