Time is money...

Spend less and do more with Kenner Chain Wall®

Installation only takes about 1 hr

- *Custom Designed & Manufactured*
- *Delivered as a Structure—No Field Pours*
- *Arrives Ready for Immediate Installation*

The elevated Kenner Chain Wall®, manufactured by Forterra, provides a structurally sound, on-grade or elevated foundation to support your prefabricated shelter or equipment building. This patented design expedites installation and can avoid potential time delays due to weather, quality control issues in the field and additional costs associated with cast-in-place or galvanized steel platform alternatives.

Benefits

- One crane installs both the chain wall and shelter in about **1 hr**
- Virtually no weather delays
- Expedites inspection and permit process
- Delivered to your site as a finished structure
- Eliminates the need for forms, concrete pours and curing time
- Minimal site preparation
- Minimal labor required
- Higher quality control
- Foundation and platform in one
- Decks, Stairway Footings, Landing Pads, and Door Stoops - also available in precast
- Environmentally friendly-minimal disturbance to the existing site
