

JAVA TURF™

HYBRID FERTILIZER

**THE IDEAL BRIDGE PRODUCT THAT COMBINES
THE POWER OF ORGANIC COFFEE WITH THE
SCIENCE OF SYNTHETIC FERTILIZER.**

FASTER RECOVERY & TURF GREEN-UP

Infused with the natural benefits of organic nutrients, JAVA TURF synthetics are engineered to provide immediate release nutrients that turf grasses require to rejuvenate and flourish after heavy play and foot traffic.

INCREASES IRON, MANGANESE AND ZINC UPTAKE IN ALKALINE SOILS

The unparalleled JAVA TURF cured coffee component is rich in polyphenols that can bind metals like iron, manganese and zinc, serving as a natural carrier in plant absorption needed for deep, lush green turf grass tones.

FEED THE SOIL & AND GROW SOIL MICROBES

The unique cured coffee component JAVA TURF provides a key source of active organic matter that energizes and activates the natural nutrient cycling processes. Soil microbes perform valuable functions required to grow healthy and vibrant turf grass.

PERK UP YOUR TURFGRASS WITH JAVA TURF. CALL 972-658-2439 OR VISIT WWW.GEO-JAVA.COM FOR MORE INFORMATION.
