

INCREASE PRODUCTIVITY

- Create different order flows for Bar and Dining Room orders to streamline efficiency.
- Orders are automatically routed to the appropriate prep stations.
- Quickly transfer checks between servers or from the Bar to a server in the Dining Room.
- Easily combine checks, separate checks and split items.
- Employees spend more time on the floor servicing customers.

IMPROVE ORDER ACCURACY

- Reflection POS steps operators through a logical order process.
- Customizable security allows ownership to control which functions employees are permitted to access.

INCREASE PROFITS

- Ensure that employees charge for add-on items
- Integrated customer loyalty encourages repeat business.
- Reduce labor costs with enforced schedules and real-time reports.

Reflection POS is the most complete and reliable table service restaurant management system on the market. Reflection POS adapts to your way of doing business, making it easy for managers and employees to learn and to operate. The restaurant floorplan gives you and your staff a graphical view of the status of each table within your establishment. Reflection POS enables restaurateurs to provide fast and accurate service, making for an enjoyable dining experience for your customers.

Why Reflection POS

Reflection POS® is proven software with more than 30,000 systems installed in 35 countries around the world.

Reflection POS® is equipped with the most sophisticated network on the market. System information is automatically replicated on every terminal across the high-speed TCP/IP network. The self-healing network automatically corrects for interruptions and resumes data synchronization without management intervention.

Built on solid-state technology and an embedded operating system, Reflection POS® is not susceptible to viruses or spyware so you can rest assured that it will be ready to perform when you need it.

Why take a chance with anything else!
