

RigorousQA is a “Testing as a Service” company offering on-demand, scalable quality software testing when and where its needed.

This flexible and agile approach to testing eliminates the high overhead costs associated with internal Quality Assurance Departments that typically are inefficient and are available during normal working hours. Using the TAAS model, RigorousQA offers its clients superior quality software testing without the headaches and costs of them doing it themselves.

RigorousQA offers deep expertise and proprietary frameworks to accelerate testing time in order to provide the best possible service to our clients. Our Smart testing tools and technologies cover all tiers of testing services such as core testing, specialized testing and specific device testing.

Who We Are

RigorousQA Software Testing is a sole proprietorship Ontario-based company dedicated to providing a new vision for quality assurance. The business is led by its President and founder, Mitch Whent, who has over 10 years of experience in the software testing industry.
