

The Dharma Horses & their stories

Wally

Wally was on his way to slaughter when friends told Katharine about this gentle giant. She rushed to see him in Texas and brought him home to DH. Wally's hooves were bruised, he had a heart murmur and an ulcer. After a year on the herbs and natural care here, he had healed and began teaching riders and helping in therapy with women needing lots of hugs.

Wally has been highly educated in his past. When given certain Dressage aids, he can do advanced movements with confidence (and his riders often accidentally signal him!).

This special being was saved from the horrors of a violent death and remains a sort of "soul mate" to Katharine.
