

Portable Radiant Heater

Model: **SUNFIRE® 100** Radiant Heater

The SunFire 100 is a portable, construction/industrial grade heater manufactured in the USA by Clean Burn. The SunFire100 will warm the objects and people in your work area to provide an efficient, portable heat source and keep your employees warm and productive.

Radiant heat warms the objects within its vicinity instead of warming the air; so, your employees and surfaces are warm. The SunFire Radiant Heater's proprietary burner provides a clean, efficient burn while it provides maximum heat. It's rugged construction allows for a variety of applications whether you have an automotive repair shop, agricultural application, need heat at an outdoor event, at a construction or excavation site, the SunFire Radiant Heater will keep you warm all day.

ADVANTAGES:

- ◆ Clean Burn proprietary firing chamber design
- ◆ Odorless and smokeless
- ◆ Quiet operation
- ◆ Standard with fuel filter heater for ultra-cold weather operation
- ◆ Rugged all steel frame and welded steel fuel tank
- ◆ Fuel gauge included as standard
- ◆ Heater tip switch installed - heater will shut off if tipped over
- ◆ Rubber (flat-free) wheels on steel/ball bearing rims
- ◆ Easy lift handle for ease of transport over rugged terrain
- ◆ Low emissions (well below OSHA guidelines)
- ◆ Can be connected to an optional thermostat
- ◆ Heater head can be tilted for more directional heat

APPLICATIONS:

- ◆ Building Construction
- ◆ Warehouses
- ◆ Sporting Events
- ◆ Logging
- ◆ Ranching
- ◆ Agriculture
- ◆ Automotive and Truck Repair
- ◆ Any Outdoor Machinery Repair
- ◆ Emergency Heating
