

# City Employs Reinforcement to Maximize Pavement Service Life on Resurfacing Over Old Concrete Pavements

## GENERAL INFORMATION

**Project Title** New Philadelphia 2012 Resurfacing Program  
**Property Owner:** City of New Philadelphia  
**Product Used:** GlasPave 25  
**Installed By:** PS Construction Fabrics  
**Install Date:** Summer 2011  
**Contact:** Jim Zucal  
Public Works Director

## BACKGROUND

### **Reason for Product Use:**

Older concrete streets needed resurfacing and traditional resurfacing methods were not performing well. GlasPave 25 provided reinforcement over the jointed concrete and also waterproofed the pavement to decrease thermal damage.

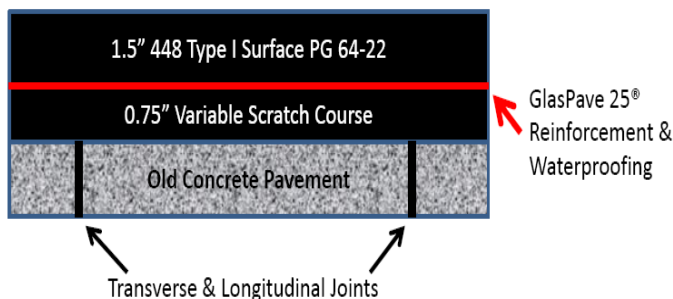

## INSTALLATION

The product was installed quickly without issue. The pavement was ready for the surface course without delay. In addition, the product reduces the amount of joint repair necessary prior to resurfacing, saving significant dollars on the project.

## RESULTS

The pavements were evaluated very positively after the winter where significant moisture and freeze/thaw cycles produced nearly zero cracking over the many underlying joints.
