Creasers & Perforators

SMC-12F

SMC-13

ELIMINATE DIGITAL CRACKING!

Shark Finishing Machinery introduces to its Smart line of print finishing equipment Digital Creasers / Perforators. These machines will eliminate your digital cracking once and for all. They feed up to a maximum sheet width of 13.3" and perform up to 16 creases or perforations per sheet. Our creasers offer precise creasing every time and are easy to set up and very user friendly. They feature easy to replace front-loading interchangeable creasing & perforating dies, and simple to operate LCD touchscreen controls. These machines would be a great addition to any digital shop.

- Variable speed
- Up to 16 creases / perforations per sheet
- Precise Creasing Accuracy
- Sheet length detector
- Sheet Counter
- Emergency stop button for added security
- Allows for creasing depth adjustment
- Crease digital stock without cracking
- Creasing & Perforating
- LCD Touch Screen Display
