

No Bypass Required

A Better Alternative to Bypass Dampers

The New Zone-ESP™

Zone Control System with built in Static Pressure Control eliminates the need for a bypass damper.

Patent Pending

It Doesn't Get Any Simpler Than This

- Easy To Install
- Lowers Labor Cost
- Lowers Overall System Cost
- Eliminates Tight Space Issues
- Increases System Efficiency
- Uses Standard 3-Wire Zone Dampers
- Factory Set (Easy to Adjust)
- Prevents Coil Freeze-Up
- Eliminates Air Noise
- 10-Year Warranty

ZONE-ESP™

ZONE CONTROL SYSTEM

NO ADJUSTMENTS REQUIRED

PATENT PENDING

HOW IT WORKS

The system works like any standard zone control system with one exception; a static pressure sensor continuously monitors the system static pressure. If the static pressure goes above setpoint, the ESP panel will power the non-calling zone dampers open just enough to relieve the excess pressure.

Tests indicate that bleeding a small amount of conditioned air for a short time into non-calling zones has little to no impact on the zone temperature.

AVAILABLE IN THE FOLLOWING MODELS

Z-200-HC-ESP	1 Heat / 1 Cool - 2 zones
Z-300-HC-MS-ESP	1 Heat / 1 Cool - 3 zones
	2 Heat / 2 Cool - 3 zones
Z-300-HPS-ESP	2 Heat / 1 Cool Heat Pump - 3 zones
	2 Heat / 1 Cool Dual Fuel - 3 zones
	3 Heat / 2 Cool Heat Pump - 3 zones
	3 Heat / 2 Cool Dual Fuel - 3 zones
