

HOWARD SPT Spreaders

The master of spreaders for green areas and garden applications

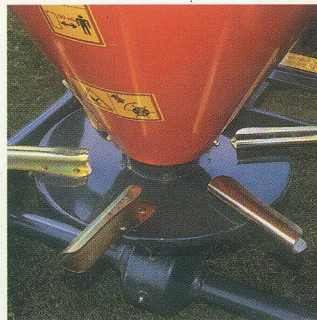

The SPT Series have been designed to be used in combination with small tractors, garden trucks or other vehicles without PTO shaft nor hydraulic elevator. They can be used for spreading fertilizer, sand or salt depending on the needs of the user. The SPT range fulfill almost every need on capacity or working width.

Strong gearbox with disengaging lever.

Easy adjustment for spreading dose.

Spreading disc with adjustable vanes.

Strong tubular frame overdimensioned to resist tensions even with the hopper filled up while driving.

SPT-300

SPT 050 pulled type.

High quality-low maintenance

The SPT range matches the standards today's users are asking for:

- Easy regulation.
- High quality materials.
- Low maintenance.
- Security during work or transport.
- Long life product.

SPT 50/100/160

Side regulation and adjusting device for quantity.

Reversible spreading disk. Same distribution independently of the working direction.

SPT Spreaders

Model	Capacity gal.	Capacity lib.	Loading height in.	Width in.	Empty weight lb.	Spreading width ft.	Working speed mi/h	Tires / pressure
SPT-050	11	121	31	28	66	3 / 20	2.5 / 3.7	13.500 / 6 1.5 bar
SPT-100	28	298	38	32	75	3 / 20	2.5 / 3.7	
SPT-160	39	399	41	36	82	3 / 20	2.5 / 3.7	
SPT-300	79	816	51	47	265	20 / 40	2.5 / 7.5	18 x 950 4PR 2.2 bar

Specifications

- Wheel actioned disk.
- Pulled Type.
- Vane regulation.
- Width regulation.
- Disengaging of disk rotation (SPT-300).

Optional equipment

- Spread limiter.
- Handles for manual control (SPT-050, SPT-100).
- Seat for SPT-050.
- Agricultural wheels
