

In his own words...Keith Misja

To be on the Sarasota Military Academy Male Raider Team for the state competition was an honor to say the least. The experience was like nothing else. We couldn't have asked for a closer ending score for the district and state meets. Tying manatee twice and winning by the pt scored shows that our dedication in the many practices in the mornings, over Christmas break, after school and on the weekend paid off. My teammates pretty much became like brothers. We shared the good the bad and the ugly together. We did everything for the guy beside us. Looking back, I can't believe we pulled it off. We made history by being the first Raider Male Team from SMA to win states. To be a part of this was certainly an amazing experience.

Ever since my first day on Raiders as a freshman, I admired those who competed at districts and states. I wanted to be one of them. After three years of hard work, it finally happened. States was the hardest Raider challenge in which I have ever competed. I don't think I will ever have an experience like that again. I can't wait for next year!
