

Spring Water Service in Waskesiu

Waskesiu, SK, April 2019

Last September and October, below -8 C temperatures created over 100 breaks in the seasonal water system in Waskesiu.

The breaks will be repaired in May 2019 (depending on weather) and will result in delays to turning the water on.

Breaks are repaired in the order of the system. Water turn on will start at Pelican Street and work through the cabin area street by street.

Repairs will be made as quickly as possible. Two plumbers and additional staff are available if needed to carry out the work. Required parts are on hand.

Shower facilities are available at the small beach house and at the Spruce Ridge Campground.

Water is also available via the outside tap at the Visitor Centre.

Thank you for your patience.

To prevent future breaks of this nature, see the revised Water Services Shutdown Directive.
