

ANNOUNCEMENT

Max McCardel joins Safe System Solutions Pty Ltd

We warmly welcome Max McCardel to Safe System Solutions Pty Ltd in the role of Senior Projects Engineer.

Max commenced his career at VicRoads in early 2015 and quickly developed an interest in road safety and construction management. Max's years at VicRoads included developing, planning and delivery of an array of road safety projects within the North East Region and at a statewide-level within the Pipeline team of Policy and Programs. Max has particular technical strengths in cyclist and pedestrian treatments, raised safety platforms, gateway treatments and project development/business case writing.

Max has also lived and worked abroad, spending 2016-2018 in Edinburgh, Scotland. His time in the UK strengthened his knowledge of construction practices and project management as well as broadened his understanding as to how other government bodies approach road safety and compliance. After two years of dreary, wintry conditions, Max opted to return Melbourne's sunshine and beaches. No sightings of the Loch Ness Monster have been reported.

Max brings with him an innate energy and enthusiasm that is immediately apparent.
